## QUALIFICATIONS AND CREDIT FRAMEWORK

The University's Qualifications and Credit Framework was updated from 2009 when designations of levels were changed. It had been previously revised from 2002 to change the designations of some levels and to introduce some new awards. The Framework aligns with those in use in the rest of the UK Higher Education sector and with the Framework for Higher Education Qualifications (FHEQ) of the UK Quality Assurance Agency for Higher Education. Levels 1, 2 and 3 (previously A) are pre-undergraduate levels and there are restrictions on the amount permitted in programmes. Levels 4, 5, 6 (previously 1, 2, 3 or B, C and D/M1) are the levels associated with undergraduate study, with level 6 being the highest, Honours, level. Level 7 (M/M2) is the postgraduate level and level 8 (D) is associated with doctoral study. The minimum requirements for each award in the current and previous frameworks are set out in the following tables. Actual requirements may exceed the minima identified. Candidates must gain the specified credits and successfully complete the programme assessment requirements to receive the award.
