

ICT Customer Services

Fixed media technology/audio-visual room equipment

The majority of rooms on all campuses have been fitted with fixed media technology/audio visual installations (see room list below). This equipment will be operated by the user, with technical support provided only if there is a problem.

For anyone using these rooms or anyone who is interested generally, ICT Customer Services offer training each semester. Attendees will learn about the use of the fixed media facilities (data projector, computer, VHS/DVD etc) located within these areas.

Main Lecture Theatres additional note:

The control and operation of the fixed media technology installations in some of our main lecture theatres (**highlighted in red above**) is different from that used in the standard teaching/meeting room installations. Therefore, staff using these rooms will **need** to attend an extra training session in their use, **in addition** to attending a standard teaching/meeting room training session. These extra sessions will be run in conjunction with the standard teaching/meeting room training sessions (please note separate times).
