Active Learning

Teacher

Active learning puts students at the centre of their learning through participation in activities linked to their learning outcomes.

Environment

A flexible space works best for this, where students can move the furniture and split into groups to collaborate on set activities. Students may want to break out into social spaces for activities.

Technology

Although not essential, a room with projector and good Wifi would be beneficial. Office 365 could be used for student collaboration.

Notes

Student

Students are expected to engage and participate in set activities, work collaboratively and respect other students, staff and their opinions.

Environment

Students should feel free to adjust the environment to suit how they want to learn. Social spaces could also be used, but the lecturer should be informed and students should return once finished for discussion.

Technology

A laptop or mobile device to collaborate with peers via Wifi, may be useful, but not essential

Notes
