

Moulding Technology Ltd – Enhancements in Production Output of Moulded Plastic

Moulding Technology Ltd. - based in Co Longford - has over 20 years' experience in moulding and finishing large and small plastic parts for the automotive, electronic consumer goods, medical and construction sectors.

The company embarked on a collaborative project with the Ulster University, School of Engineering, via InterTradeIreland's FUSION programme, to enhance their production output of moulded plastic parts and enhance product quality.

As a result of the project the company has established new production methods that have improved efficiency, productivity and quality of the products.

The FUSION programme, supported by InterTradeIreland, offers companies funding to access the top-flight research and development capability of scientists and researchers at Ulster.

"The ability to utilise the expertise and world class facilities at the Ulster University has allowed us to move forward with new and exciting products for the future." Joe Hughes, Managing Director, Moulding Technology Ltd.
