Meet us!

Throughout the year we hold several in-person and virtual events where you can meet our current students and course teams who will share the many benefits of studying a postgraduate course at Ulster.

You can find out more and register for future events by visiting our website.

Students UK, ROI & EU - ulster.ac.uk/postgrad
International Students - ulster.ac.uk/global/events
Hello from Ulster University

At Ulster University, we want to give you the most rewarding student experience possible. From our teaching underpinned by world-leading research, to our focus on your future career and the many opportunities for you to discover your passions, we aim to give you the platform to excel.

We have asked our students what they love most about Ulster University so you can find out the genuine benefits from real people studying and embracing life here.

There is a lot that they love! From the enthusiasm and expertise found in our academic teaching and the help provided by student support, to the spectacular settings of our campuses and the diverse range of sports and societies available. The key thing that always comes across is the friendly atmosphere and sense of community and togetherness that is found at Ulster. Come and experience it for yourself at one of our open days.

We know that choosing where to go to university is not just a decision of where to study – it’s a decision for life.

We not only care about your time at university but also what happens after you graduate. At Ulster our strong collaborations with industry and our understanding of future sector needs means our diverse range of courses are created with your career in mind.

Whatever your aspirations, at Ulster we want to give you a learning experience that will stretch your mind, help you embrace challenges and strive for the inconceivable. We want to make you the artists, engineers, scientists and entrepreneurs of tomorrow.

With best wishes,

Professor Paul Bartholomew
Vice-Chancellor and President
Why study a Masters at Ulster?

A postgraduate Masters qualification can boost your career prospects and your bank balance.

Top reasons to study a Masters:

1. Study professionally relevant courses and boost your CV
2. Differentiate yourself from the crowd
3. Specialise and become an expert in your field
4. Achieve required professional qualifications or accreditations
5. Change your career and follow your passion

Why study at Ulster?

- Ulster University has an outstanding range of opportunities across all disciplines with more than 300 courses currently available.
- Our programmes have been developed with input from industry and professional bodies, ensuring they meet industry requirements and incorporate professional accreditations where possible.
- Access our professional services to take advantage of our careers advice and employer networks from qualified staff for five years after you complete your degree.
- We are globally renowned for our teaching quality and are proud to count leading experts and practitioners among our teaching staff.
- Our world-class research enhances our teaching by ensuring your course content includes cutting-edge thinking.
- Our campuses offer an inclusive learning environment, welcoming students from all backgrounds including returners to education.
- Our courses are competitively priced to ensure value for money and we offer flexible repayment terms.

Our Masters Programmes

We offer two types of Masters degrees, taught and research, which can be further categorised depending on the subject studied.

If your ultimate end goal is a Masters, you will need to complete the required number of credit points and will typically need to complete a dissertation.

1. Masters with Applied Practice are normally two-year full-time degrees with an industrial placement or research project respectively.

2. Integrated Masters are typically offered in science or technology programmes and combine undergraduate and postgraduate study into a single course. They are usually completed in four or five years (depending if a work placement is completed).

I signed up for the MSc Environmental Management part-time distance learning course with Ulster. I can fit my studies around my full-time job, the work is extremely interesting and the tutors are so helpful and understanding.

Build your career through our flexible postgraduate study programmes

A postgraduate qualification can lead to more fulfilling career opportunities and enhanced earning potential.

At Ulster, we have a wide variety of flexible postgraduate study options where you can develop new skills in your chosen area, change careers or follow your passions.

Our courses are designed so that you can achieve your end goal at your own speed

Many of our Masters programmes are offered as part-time or on-line. If you are not able to commit to a full Masters programme, you can still gain highly desired skills and a CV differentiating qualification, through either a postgraduate certificate or diploma.

How far will Ulster take you?

Postgraduate awards are comprised of a number of credit points. Credit points are accumulated by completing modules.

Your credit points will build towards an award or qualification and, once achieved, you can move onto the next award level following the successful completion of further study.

Some courses or subject areas have more than one award available. This means that you can choose the award or level that best meets your needs.

It was nerve wracking for me returning to study after so long out of academia, but I am excited to be studying at Ulster University. I am an Occupational Therapist originally from the UK but currently living in Belgium, so I am delighted that my Masters degree is all online. So far, it has been a great experience!

Louise Franklin
Professional Development in Occupational Therapy
Short Courses and Continuing Professional Development (CPD) (5–30 Credits)

With courses starting throughout the year, our short courses are designed to help you develop your professional career. A number of these courses are recognised by professional bodies and meet industry CPD requirements. Courses (from 5 to 30 credits) can be taken individually or combined towards a Postgraduate Certificate of Professional Development (60 credits).

Postgraduate Certificate of Professional Development (60 Credits)
The Postgraduate Certificate of Professional Development is awarded when a combination of short courses, worth 60 credit points in total, have been successfully completed. Credit points achieved do not contribute towards a PGDip.

You can choose to complete one short course and then return to take a further course at a later stage.

Postgraduate Certificate (PGCert) (60 Credit Points)
Many people choose to complete a Postgraduate Certificate to further their knowledge in their undergraduate discipline and enhance their employment prospects. You can usually complete this level on a part-time basis within one year. We offer both stand-alone courses and some that help you build towards a Masters degree.

Postgraduate Diploma (PGDip) (120 Credit Points)
Usually completed on a part-time basis within two years, this is a more intensive programme of study than a Postgraduate Certificate but does not involve the completion of a dissertation. As with Postgraduate Certificates, we offer both stand-alone courses and some that help you build towards a Masters degree.

Masters Programmes including Masters with Advanced Practice or Applied Research (180–240 Credit Points)
If your ultimate end goal is a Masters, you will complete the required number of credit points and will typically need to complete a dissertation.

Common awards include:
- Master of Arts (MA) (180 Credit Points)
- Master of Science (MSc) (180 Credit Points)
- Master of Research (MRes) (180 Credit Points)
- Master of Laws (LLM) (180 Credit Points)
- Master of Education (MEd) (180 Credit Points)
- Master of Fine Art (MFA) (240 Credit Points)
- Masters (MA) with Advanced Practice or Applied Research (240 Credit Points)
- Master of Architecture (MArch) (240 Credit Points)
Dr Joe Rafferty

**Position:** Lecturer in Computer Science

**Faculty:** Computing, Engineering and the Built Environment

**3 Professional Highlights:**
- Developing a sensing solution to help those who have dementia, which was subsequently licenced to a local technology company. This project received the Ulster University Impact Excellence Award for Research Impact in 2018.
- Working with the BT Ireland Innovation Centre on several research-led innovations. This work has been recognised through a range of national and international awards from prestigious bodies such as Digital DNA, the TM Forum and the British Computing Society.
- Developing a free-to-use, Northern Ireland wide, Internet of Things (IoT) network. This network enables IoT devices to communicate to backend services in a secure fashion while consuming very little electrical energy, and enables the proliferation of smart solutions such as asset trackers, emergency beacons and remote monitoring of dangerous chemicals.

**Why I teach at Ulster:**
Ulster has incredible links with industry, which allows me to work with employers to identify what skills are needed for the future, and then develop programmes to help students get those skills. Our industry links help both my teaching and research to be really practical, and teaching cutting-edge technologies to the next generation of developers is incredibly rewarding.

Dr Valerie Hinch

**Position:** Teaching Fellow/Placement Coordinator/Course Director Biomedical Science

**Faculty:** Life and Health Sciences

**3 Professional Highlights:**

**Why I teach at Ulster:**
During 18 years of professional practice as an Advanced Biomedical Scientist, I developed a strong passion to share my expertise with our students so they can progress to become professional Biomedical Scientists and be at the forefront of patient healthcare.

We are committed to delivering industry-relevant education taught by a staff of world-leading experts and practitioners.

We work closely with employers and awarding bodies to develop our curriculum. This ensures our courses are relevant and, where possible, offer the professional qualifications and accreditations most desired by employers.

This is even more important now as industries are transforming at an unprecedented speed and employers are actively seeking employees with the skills and competencies to lead, adapt, and inspire.
Teaching from real-world experience

Dr Judith Wylie
Position: Senior Lecturer
Faculty: Ulster University Business School

3 Professional Highlights:
- Completing my professional exams to become a Chartered Accountant whilst training as a forensic accountant, an exciting career which allowed me to work on global fraud investigations.
- Leading a team which won a Distinguished Teaching Fellowship Award for excellence in embedding employability within teaching and learning activities. This included initiatives such as starting up a student business society which organises several events throughout the year – the highlight is always the annual ball!
- Completing my PhD investigating corporate social responsibility, exploring how businesses give back to people and the planet. This is a topic which is close to my heart and I am proud of how sustainability is embedded into everything we do at Ulster.

Why I teach at Ulster:
I absolutely love teaching at Ulster as we have such a strong connection with the business world so all my teaching and learning activities have a professional and entrepreneurial focus. I get a real buzz when we engage in guest lectures or active learning activities (such as online fraud investigation games with companies), and the professionals taking the lead are recent graduates. It is so inspiring to see the students you have taught excel in their careers and inspire the current students to achieve their goals.

Dr Declan Keeney
Position: Director of the Ulster Screen Academy
Faculty: Arts, Humanities and Social Sciences

3 Professional Highlights:
- My students winning eight Royal Television Society Awards for film work they did with me in class. Always delighted when my students excel.
- My first broadcast credit on the BBC as a BBC camera operator. It was for a live broadcast during Children in Need on BBC1 many years ago.
- Moving into academia from a career in television production, I graduated with a PhD in Film, which was a very proud day for me and my family.

Why I teach at Ulster:
I came to Ulster because we are leaders in learning and teaching for the Screen Industries. I lead the Ulster Screen Academy and we offer incredible degrees in Screen Production, Cinematics Arts, Animation, Gaming, Interaction Design, Interactive Media and more. Our courses are world class and it is an exciting place to be right now.
There are so many great reasons to study in Northern Ireland

A home from home

Northern Ireland is famed for being a friendly and affordable place to study, so whether you are coming to Northern Ireland for the first time, or have lived here all your life, you can be sure you’ll enjoy one of the best student lifestyles in the world.

Connected

Northern Ireland is easy to get to, and around. The two main cities of Belfast and Derry~Londonderry are connected by road and rail, and there are plenty of ways to visit other areas of the country.

Affordable

Northern Ireland has the lowest student cost of living among UK regions (The National Student Money Survey 2020, savestudent.org). Students studying in Northern Ireland enjoy low rents, affordable living expenses, and lots of free entertainment.

Culture

Northern Ireland has lots of free museums, festivals, music and art so you’ll never be short of something to see and do.

Parent friendly

There’s plenty to do when your family comes to stay. Visit filming locations for popular TV shows like Game of Thrones, Line of Duty or Derry Girls, go to the Giant’s Causeway World Heritage Site, stand in the spot where the Titanic was built or relax and catch up over a leisurely meal.

Great food

From local delicacies to international cuisine, every taste is catered for.

The great outdoors

You’re never far away from an amazing experience in the great outdoors. From sea to mountain, there are lots of opportunities for surfing, canoeing, cycling and hiking in some of the most beautiful countryside you will ever see.

Nightlife

Live music, affordable clubbing, a vibrant LGBT+ scene and friendly community make Northern Ireland a great place to enjoy a memorable night out.
**Life on campus**

**Getting to Northern Ireland**

With direct flights from over 40 destinations, and the international hubs of London and Dublin close by, Northern Ireland is easy to reach from anywhere in the world.

Fast ferries running multiple times each day from the ports of Belfast and Larne will get you to Scotland and England, and Wales can be reached from Dublin.

**Campuses you’ll love**

We have multiple campuses across Northern Ireland in Belfast, Coleraine, Jordanstown and Derry-Londonderry.

Each campus has its own distinctive atmosphere and you can be sure that wherever you choose to study, you will have a fantastic student experience.

Our Magee campus is located in the heart of Northern Ireland’s second city, Derry-Londonderry, the capital of the North West, and is only a short distance from idyllic County Donegal.

**Campus character**

Magee offers the best of both worlds – a city campus with a friendly vibe. Impressive, historic buildings such as our iconic Martha Magee building, blend perfectly with our modern £1.1M state-of-the-art teaching block and £1.3M refurbished library facilities. This campus is home to the Spatial Computing and Neurotechnology Innovation (Scan-i) hub which uses cutting-edge technology to determine the brain and body’s responses to stress, fatigue, achievement and other stimuli to develop the next generation of human/machine interaction. There are performance spaces for those studying music and drama and collaborative study spaces for those working on group projects. Magee’s diverse range of courses include business, nursing, sport, music, drama, computing and engineering so there is something for everyone.

The City of Derry is famous for its festivals, including the Foyle Film Festival, Halloween celebrations, Maritime Festival and Derry Jazz Festival. The vibrant nightlife is complemented by a wide range of cultural venues and activities, and the city’s fame has spread thanks to the popular TV show Derry Girls. Alongside being one of the most affordable places to live in the UK, the friendliness of the people of Derry-Londonderry make our Magee experience truly “Legenderry”.

---

Ulster is a fantastic university that offers quality education, and the admission process was so smooth and fast. UU has a diverse community because it offers a place where everyone can find a sense of belonging and acceptance.

The University also offers lots of vacancies and opportunities to foster growth and help students build their career. The lecturers are very nice and always ready to help. Magee is a beautiful city with nice locals who lend a hand when I can’t find my bus route or my way around. Ulster University is home away from home.

Bintan Ashorobi

International Business

with Data Analysis
Situated on the banks of the River Bann and just three miles from the bustling seaside towns of Portrush and Portstewart, our Coleraine campus is an outdoor lover’s dream.

Campus character

Courses at our Coleraine campus focus on health, the environment, hospitality and communication. The beautiful campus complex includes the Riverside Theatre, a state-of-the-art sports complex, woodland heritage trail as well as modern teaching and studying facilities. We have invested £6.5M in a media centre which includes a BBC TV studio, multimedia newsroom and editing suites. The campus also houses a model pharmacy and working optometry clinic which offers free student-led eye tests.

The Atlantic coast offers opportunities for surfing, body boarding and lots of other water sports. The Giant’s Causeway World Heritage Site, Game of Thrones Ballintoy Harbour and Carrick-a-Rede rope bridge are must-see attractions within easy striking distance of campus. The area is famed for its sporting credentials, hosting both the Open Golf Championship and the North West 200 motorcycle festival.

Above all, it’s a welcoming place for students, with lots of cafes, bars and club nights available making our Coleraine campus extremely popular.

The Coleraine campus at Ulster University is the place to be! I’ve studied here for over 4 years, and it has been amazing throughout! Starting in 2016, I studied for my Bachelor’s in Psychology which granted me the skills and qualifications to pursue my current PhD. The topic is super interesting, and the people are just lovely! The lecturers in Psychology have always been very helpful and forthcoming and I couldn’t recommend the Coleraine campus any higher!

There is an active Student’s Union community, a gorgeous nature walk and a plethora of exciting and intriguing events, societies and sports to participate in. The opportunities that Ulster University provides are amazing too!

Oisín Cleary
PhD Researcher
The Belfast campus is located within Belfast’s Cathedral Quarter, the bustling cultural centre of the city. We have invested heavily in developing modern, state-of-the-art facilities with the latest technologies to provide you with the best learning experience possible.

Campus character

With digital and social connectivity at its heart, our Belfast campus has a modern, creative vibe and embraces a range of subjects including art and design, architecture, hospitality, computing, engineering, business and management. The campus is home to The Academy – our award-winning training restaurant, an art and design shop showcasing the talent within Belfast School of Art and exhibition spaces. The brand-new 75,000m² development will accommodate 15,000 students and staff and is the core of the innovation district of the city.

Justice
Human Rights Law
Francesca Lois Sarenas

When I decided to pursue my Masters after being awarded a Chevening Scholarship, I knew I didn’t have a “choice” regarding universities. Ulster’s Transitional Justice Institute is the oldest and most developed department of its kind in the whole of the UK, so I knew my LLM in Transitional Justice had to be there.

I’m so excited to be doing this next stage in my academic journey at Ulster and it’s been great to be able to experience both the Jordanstown and the new Belfast campus while doing my programme this year.

Francesca Lois Sarenas
Human Rights Law
& Transitional Justice
Your learning experience

How will I learn?

Teaching is delivered primarily through lectures, seminars and tutorials, as well as practicals and fieldwork.

When will I learn?

We offer our courses on a full-time and part-time basis and teaching may be delivered on campus, by online, or a combination of both (blended learning).

Teaching times vary from course to course. You may have classes in the morning or afternoon (more typical for full-time courses), or in the evening.

Some of our postgraduate courses are delivered by block teaching. This is an intensive period of learning, e.g. three full days once or twice per semester (a semester is 12 weeks) which allows you to fit your other commitments around your classes.

Study around your job commitments

For students who are combining their learning experience with work, our eLearning courses offer flexibility, enabling you to study at your own pace, any place and any time.

How will I be assessed?

Assessment methods vary depending on the course and may include a mix of examinations, assignments, group work, coursework portfolio, presentations, clinical practice, or real-life industry projects, among other activities.

Equipment and facilities

You will learn in state-of-the-art facilities, with industry-standard equipment. Our architecture super-studio, award-winning student-run restaurant, TV studios, financial trading room, laboratories, art workshops, on-campus optometry and model pharmacy are just some examples of how you benefit from our investment in modern facilities which mirror what you will experience when you start working.

Leaders of learning innovation

Ulster University is at the forefront of learning innovation. We introduced digital learning 20 years ago and have constantly been developing how we teach to ensure it is engaging, interesting, flexible and meets the needs of our students.
Professionally relevant global training and education

We work hard to ensure employability is at the heart of the learning experience we deliver and that our courses are professionally relevant, in line with industry needs. Each of our four Faculties work in close collaboration with employers and awarding bodies to develop our curriculum and have achieved extensive accreditation from a range of professional bodies, across our entire suite of programmes.

(Please check individual course information for accreditation details at ulster.ac.uk)

Computing, Engineering and the Built Environment
Every day our cutting-edge research and innovations are making a difference to thousands of people and their communities while developing the careers and industries of the future.

Taught by world-class researchers and academics, you will benefit first-hand from our discoveries and advances, developing the knowledge and skills to help transform economies and societies.

Ulster is renowned and respected for its world-leading research, as demonstrated in the 2014 Research Excellence Framework (REF).

**Ulster University Doctoral College**

There are numerous opportunities available throughout the year to apply for fully-funded PhD scholarships, and these are listed on the Doctoral College website, [ulster.ac.uk/doctoralcollege](http://ulster.ac.uk/doctoralcollege).

PhD researchers at Ulster can also access the ‘Researcher Development Programme’, a comprehensive suite of face-to-face workshops, online learning provision and other training and development opportunities.

Options are also available for international PhD researchers to study under the Framework for Distance Research Study.

OVER £45M INVESTED IN RESEARCH EVERY YEAR

Name: Professor Jim McLaughlin
Position: Head of the School of Engineering
Making a difference by: Saving lives with earlier diagnosis of heart disease.
Challenge: Heart disease is the leading worldwide cause of death with 2% of healthcare expenditure spent managing heart failure.
Goal: Increase speed and accuracy of diagnosis which subsequently improves the treatment of heart disease and reduces the number of strokes.
Result: Wearable heart failure devices which measure critical ECG, skin temperature, heart and respiration rates. Data is sent via Wi-Fi for clinicians to download quickly and easily.
Make a difference by studying: MSc Biomedical Engineering

Challenge: Current instruments and tools are challenging or inaccessible for some disabled musicians and composers.
Goal: Help disabled musicians compose and perform music.
Result: Using advances in creative technologies including virtual reality, Frank and his team created digital platforms so musicians with disabilities can make high-quality music. These technologies are now used by Frank’s ensemble Acoustronic of disabled and non-disabled musicians and is the first inclusive ensemble to be appointed to a national music conservatory anywhere in the world.
Make a difference by studying: MSc – Creative Musicianship.

Name: Professor Frank Lyons MBE
Position: Head of the School of Engineering
Making a difference by: Making music available to all.
Challenge: Poor diet can impact adversely on people’s health and contribute to an increased risk of disease throughout the lifecycle while better nutrition can improve health and prevent disease.
Goal: My goal is to conduct world-class research in human nutrition, and to lead other staff within my research centre to do likewise.
Result: My research impacts positively on people’s health and wellbeing throughout their lives, from pregnancy and early life through to middle and older age.
Make a difference by studying: MSc Human Nutrition, MSc Dietetics.

Name: Professor Helene McNulty
Position: Director of the Nutrition Innovation Centre for Food and Health (NICHE)
Making a difference by: Understanding and harnessing the power of nutrition.
Challenge: In Northern Ireland we found 375 pieces of litter for every 100m stretch of beach; 67% of it is plastics and 80% caused by people visiting the beach.
Goal: To reduce littering and educate the public on the importance of protecting the environment.
Result: Our research has explained the phenomenon of beach cleaning as a form of leisure-driven environmental activism. We support beach cleaning groups and give advice to the environmental sector. We are also investigating why people litter and are designing interventions that can stop this unwelcome behaviour and protect our environment.
Make a difference by studying: MSc International Tourism and Hospitality Management.

Name: Dr Susann Power
Position: Lecturer in Hospitality Management
Making a difference by: Reducing beach littering behaviour, supporting beach cleaners and protecting our precious coastline.
Challenge: In Northern Ireland we found 375 pieces of litter for every 100m stretch of beach; 67% of it is plastics and 80% caused by people visiting the beach.
Goal: To reduce littering and educate the public on the importance of protecting the environment.
Result: Our research has explained the phenomenon of beach cleaning as a form of leisure-driven environmental activism. We support beach cleaning groups and give advice to the environmental sector. We are also investigating why people litter and are designing interventions that can stop this unwelcome behaviour and protect our environment.
Make a difference by studying: MSc International Tourism and Hospitality Management.
At Ulster, we offer a range of professional careers services to support our postgraduate students. You will have access to expert advice online and on-campus, sector-leading digital resources, access to vacancy information and opportunities to meet with employers and representatives from professional bodies at on-campus events.

**Personalised service**
Benefit from one-to-one specialist advice from our experts within our award-winning Employability and Careers Hubs on campus or online.

Our consultants offer friendly and impartial support with career planning and advice on developing your employability skills.

**Earn while you learn**
Our Campus Jobs initiative will ensure that you have access to a range of on-campus, part-time, paid roles while studying at Ulster and our Employability Advisor team can support you in identifying and competing for a wide range of opportunities.

**Career support after you graduate**
The support doesn’t stop once you graduate. You will still have access to world-class coaches, mentors, and employability agents to secure your next step through our UnLockUlster programme.

Over 1,100 international companies have a presence in Northern Ireland across a variety of industrial sectors including information and communication technology; advanced manufacturing and engineering; and legal services.

Be part of a global network  

#WeAreUU

At Ulster University, we’re proud to have an alumni network of over 215,000, making an impact in communities, locally and globally.

#WeAreUU

Once you complete your study at Ulster, you will join our Alumni network. We have a very active network with many generations of Ulster graduates. During your time at Ulster, you will develop life-long mutually beneficial relationships which can be further nurtured and increased through our Alumni network.

Our Alumni are passionate ambassadors for Ulster and play a valuable role in supporting the next generation of Ulster students and graduates through mentorships, internships and financial assistance. Together #WeAreUU.

What’s in it for you?

As an Ulster graduate and member of this significant alumni community, there are many opportunities available to help you progress your career and a range of benefits and services including:

- Lifelong connections
- Exclusive invitations to events
- Access to worldwide networks
- Career advice and job information
- Discounts on University services (library, sports centres, further study)
- Opportunities to get involved and give back

Join our Student Mentoring programme

Be inspired and shape your career with help from an Ulster graduate mentor. The Alumni Mentoring Programme connects students and alumni with Ulster graduates to receive one-to-one support and guidance with career aspirations and professional development.

Become a Mentor

Are you returning to study after gaining extensive experience in industry? Then you can alternatively register as a mentor and share your knowledge and experience to nurture future talent.

We’re here for you every step of the way

University life is exciting, and we know you will experience a big change with new friends, new studies and new living situations. We are here so that you can enjoy life at Ulster University to the fullest and have the best student experience possible.

The wellbeing support for students at Magee is nothing short of amazing, all the staff are so friendly and kind and are always open to talk to anyone.

Jordan Shaffer
Computer Science

Ulster has supported me through my learning at every stage. I was diagnosed with Dyslexia in my 2nd year of study, and received an amazing amount of support through coaching and mentoring. The staff have been exceptional. They value you, get alongside you and support your growth and development as an individual.

Rebecca Hume
Advanced Diploma in Social Enterprise

Campus life

We offer lots of ways for you to connect with others, get active, learn new things and settle into university life, along with giving you the opportunity to help fellow students. We find that these experiences help you to have a healthy, productive and enjoyable time at university.

Our Student Wellbeing team is always on hand to offer free, professional, confidential and accessible services in a number of areas.

Money matters

We can help you budget and manage your money so you can live within your means. We can also offer guidance and information on financial matters including tuition fees, bursaries and access to financial support.

Counselling

All our students can access face-to-face counselling support from a trained counsellor, on or off campus. We also offer a confidential 24/7 counselling helpline.

Your wellbeing

We can provide advice and guidance on a range of issues like dealing with stress, academic matters and how to fit into student life. We want you to take good care of yourself, both physically and emotionally, and will be with you at every step of your time at UU with all the help you need.

ulster.ac.uk/wellbeing

Our AccessAbility team

If you have a disability or long-term medical condition, including mental health challenges or specific learning difficulties (e.g. ADHD, dyslexia), our AccessAbility team can provide you with a range of support and advice. You may be able to access funded support for assistive technology software and equipment or non-medical support. Let us know as soon as possible so we can work with you to meet your needs.
Support for international students

We’re here to help
Our Office for Global Engagement will support you through the application process and throughout your time at Ulster University.

Why should you consider Ulster?
Ulster delivers a world-class UK university experience with the benefit of the lowest student cost of living in the UK.

Help during your application
You can apply directly using our online application system. Simply find the course online at ulster.ac.uk and select ‘apply now’. As you work through your application we are here to help answer your questions on:
- Academic entry requirements and equivalence
- English language requirements and acceptable tests
We also hold regular webinars on applying to UU.

Help before your arrival
Once you have accepted your offer from Ulster, we are here to help you plan your arrival.
- Accommodation and where to live
- Pre-arrival information including how to get here

Free and confidential immigration advice
Our Compliance Team is here to help with visa and immigration requirements before and during your studies with us.
- Student visa
- Extending your visa
ulster.ac.uk/global/visa-immigration

Welcome Week
We’re here to help you settle into university life and living in Northern Ireland.
- Pick up service from local airports
- Information sessions
- Meet the academic teams and support staff
- Social events
ulster.ac.uk/global/pre-arrival

Come and meet us in your country!
We regularly attend fairs and events world-wide and hold WhatsApp events where you can ask questions.

### Important Notice

From the 2022/23 academic year School of Sport lectures and lab work will be delivered on the new and enhanced Belfast campus. Modules with practical sports and physical activity dimensions will continue to be delivered at the Jordanstown Sports Village, where the University’s state of the art sporting facilities and expansive outdoor spaces will be maintained.
Animation
Belfast
Full-Time/Part-Time

At the heart of Northern Ireland’s vibrant animation industry, this programme focuses on the three core components of narrative, character, and performance in the context of TV, film, and games animation.

Design Research and Development – Opportunities are developing for new narratives and audiences who interact with animation. You will advance your understanding of research and development within the creative sector and your alignment to changing markets.

Timing for Animation – Core skills in animation, developing a deeper understanding of timing and animation principles in action.

Acting for Animation – Narrative builds characters whose performances drive the story. Develop a deeper understanding of acting, character empathy, and building relationships with the audience.

Animation Production – Understand computer animation pipelines, their implementation and project management from concept through animation, compositing and editing in a commercial production environment.

Major Project – Complete a body of work in your chosen area of animation production.

Art Psychotherapy
Belfast
Part-Time

The MSc Art Psychotherapy course is a two-year part-time training programme approved by the Health and Care Professions Council (HCPC), the regulating body for the health and care professions in the UK.

The course combines experiential learning, seminars, arts based reflective practices, clinical placements, and clinical supervision. Art psychotherapy work with children, young people, adults, and older people across a range of health, education, social care, advocacy, and community services.

As a career, art psychotherapy offers an opportunity to make a difference in the lives of others. It combines therapeutic expertise, evidence-based research, social engagement, and creative ingenuity.

The course integrates HCPC professional clinical training requirements, along with practice-based learning with a variety of client groups.

Art psychotherapy is life changing. It is a clinical practice that contributes to creative health and wellness and uses art for the communication of emotions, thoughts, and life experiences.

Professional Recognition

The course is approved by the Health and Care Professions Council (HCPC). Graduates of the MSc Art Psychotherapy course are eligible to apply to the HCPC for registration as an art therapist or art psychotherapist.

Fashion and Textile Retail Management
Belfast
Full-Time/Part-Time

The course develops resourceful, flexible, and creative managers and entrepreneurs to lead and innovate within the fashion and textile retail industry. You will increase your knowledge and understanding of the industry and be challenged to develop creative and innovative strategies, products, and systems to create a sustainable and commercially viable future vision for fashion and textile retail within a global environment.

You will investigate contemporary issues within fashion and textile retailing including branding, disruptive technologies, innovative creative retail spaces, consumer retail experience and behaviour, trend prediction, ethics, sustainability, and potential futures.

You will be supported by industry mentors, collaborative projects and industry and academic networking opportunities, and will develop skills and knowledge in:

- Project management
- Creative business problem-solving
- Visionary product and brand development
- Entrepreneurship and intrapreneurship
- Innovative retailing formats
- Investigating a sustainable future for the industry

You may also have the opportunity to engage with a range of optional practical workshops.

Fine Art (Masters Fine Art)
Belfast
Full-Time/Part-Time

Established in 1979, this rigorous studio-based programme is delivered with the expertise of a staff of internationally recognised artists. Within the studio environment, the diversity of the teaching staff’s professional experience reflects the range of approaches and contexts the course embraces.

It recognises contemporary art practice as open and pluralistic, encouraging dialogue between diverse disciplines. This approach facilitates working in a flexible manner to offer maximum opportunities for individual practice and exploration of traditional exhibition formats, alongside broader models of production and dissemination.

Critical discourse on practice, with an emphasis on creative analysis and self-reflection, contributes to an understanding of art within larger cultural, social, and political contexts.

Many of our graduates go on to establish successful studios, exhibiting internationally, gaining public-art commissions, residencies, fellowships, and awards. Others develop careers in other arts sectors such as curatorial practice, art writing, community arts, education, research, and administration. Further information on the MFA Fine Art and its alumni activity is available at mfabelfast.wordpress.com
At the Belfast School of Art we strive to develop unique photographic voices at the cutting-edge of a contemporary international context, while also mining the specifics of our unique geographical and cultural position.

We have been profiled by the British Journal of Photography as one of the most significant photography schools in Europe. The teaching team is comprised of contemporary practising photographers who exhibit and publish internationally. These include Ailbhe Greaney, Ken Grant, Frederic Huska, Kevin Gaffney, Sandra Johnston and Clare Gallagher, as well as Martin Parr and Donovan Wylie.

Students are often photographers who continue careers with a newly refined expansion of their personal and professional practices. Alongside photographers working in the commercial fields of editorial and design, graduates also publish, exhibit and work as educators and developers of photographic culture.

The course is represented as a member of the Society for Photographic Voices at the cutting-edge of a contemporary international context, while also mining the specifics of our unique geographical and cultural position.

UX and Service Design is a unique, research-focused Masters bringing together three of design’s emerging specialisms - UX, Service Design, and Design Thinking – as part of a single educational experience.

The course responds to continuing changes in contemporary design practice by foregrounding human experience and social research approaches.

Teaching takes place over three semesters. Semester one focuses on principles and techniques, semester two sees students specialise, and in semester three students work on an individual, self-directed project.

There is a strong emphasis on group work and collaboration throughout. By connecting to external organisations, companies, and wider stakeholders, it is expected that you will expand horizons and push boundaries, exploring how design may contribute to real change in the areas of technology, leisure, and daily life.

MA UX and Service Design offers you a creative context in which to advance your existing knowledge and a space to develop new forms of practice based on a ‘reimagining’ of the possible.

The MSc Social Policy offers you the opportunity to acquire detailed knowledge and understanding of contemporary social policy, including the working of devolution in the UK. You will receive an excellent training in social research methods, effective dissemination, policy analysis, and the ability to apply theoretical perspectives and concepts to real-life problems.

The course has a strong focus on major societal challenges such as social justice and inequality, and global perspectives on these issues. You will benefit from working with a team of internationally recognised researchers and educators committed to facilitating students’ personal, intellectual, and professional development.

As a student in the School of Applied Social and Policy Sciences you will also benefit from the research expertise of our staff and from the work of specialist research centres in the School, such as ARK (ark.ac.uk).

The course is suited to those aiming for a career in the public sector, in NGOs, and in private sector research organisations. It is also geared towards professionals working in these sectors who are seeking to enhance career progression.
Criminology and Criminal Justice

Belfast

Full-/Part-Time

This course is designed to generate critical thinkers and skilled practitioners who are equipped to improve criminal justice outcomes. You will be immersed in cutting-edge knowledge, techniques, and approaches. This will develop you to effectively challenge and engage critically in community youth work issues through informed and innovative methods of teaching and learning.

The degree responds to growing industry demand for applied knowledge and practical understandings in areas such as crime prevention, designating-crime, restorative justice, cybercrime, white-collar crime, digital forensics, victim support, and evidence-based policy and practice. If you want to open new career horizons, the MSc in Criminology and Criminal Justice is your professional gateway.

As a dedicated and enthusiastic team of internationally recognised scholars, we are committed to critical criminology, evidence-based policy and practice, and investing in your personal, academic, and professional development.

We provide students with the knowledge and skills for professional practice. We facilitate the development of reflective and effective practitioners through a range of assessment methods. The course enhances the professional skills and employability of community youth workers. You will be encouraged to challenge and engage critically in community youth work issues through informed and innovative methods of teaching and learning.

There are a range of career options available to graduates and these include opportunities across the statutory and community and voluntary sectors. Graduates will be qualified Community Youth Workers equipped to undertake key roles to the required standard.

Students are normally in part-time (16+ hours p/w) or full-time, paid employment and many will change employment during or following completion of the course. Other students are promoted to managerial or project-based leadership roles.

Professional Recognition

The course is professionally recognised by the North South Education and Training Standards (NSETS) committee which is the professional body for youth workers in Ireland.

Community Youth Work

Magee

Part-Time

Public Administration

Belfast

Full-/Part-Time

This exciting course has been designed to improve the quality of public sector management as a profession. If your role includes policy development, management, or governance, you will find that this degree will help you to develop an integrated and critically aware understanding of these areas, enhancing your effectiveness in the workplace.

Course participants will be drawn from the public, voluntary and community sectors, both locally and internationally. Administrators, managers, and professionals from a wide variety of organisations are likely to find this course beneficial.

This internationally renowned programme is offered by leading academics from the International Conflict Research Institute (INCORE) at Ulster University. It is a unique opportunity to undertake an interdisciplinary graduate programme characterised by academic excellence, within the context of a vibrant and culturally rich society emerging from conflict.

Attracting students from a range of countries and a wide variety of academic backgrounds, it has a strong focus on critically assessing the causes and consequences of conflict and examining the theories and practices of post-violence peacemaking.

You will work to address the causes and consequences of conflict locally and internationally, and to promote better peace making and peacemaking strategies. The experience of engaging with leading academics and practitioners in the field is a hallmark of the programme and the location of Northern Ireland ensures that there is an open door between classroom and experiential learning.

Youth Workers equipped to undertake key roles to the required standard.

Students are normally in part-time (16+ hours p/w) or full-time, paid employment and many will change employment during or following completion of the course. Other students are promoted to managerial or project-based leadership roles.

Contemporary Performance Practice

### Magee

**Full-Time/Part-Time**

Combining innovative approaches to applied drama and contemporary performance practice, this course works with individuals in small group teaching to make performances that break boundaries. Whether you’re interested in applied performance, arts and disability, performance and conflict resolution, or contemporary practice, this course will develop skills, knowledge, and experience.

The course includes a placement with a professional organisation of your choice and has close links with the industry including Theatre and Dance NI. It engages directly with the creative industries and related fields of employment. There are opportunities to work across discipline boundaries.

Our subject team of internationally recognised academics is committed to creating links between the course and the creative industries through placement experiences, visiting workshops, and talks by visiting professionals. You will also have the support of the University’s Careers and Employability team.

As well as preparing you for a variety of employment areas within the creative and cultural industries, the work on personal development planning and entrepreneurship creates learning opportunities that directly support you in maximising your career potential.

Creative Musicianship

### Magee

**Full-Time/Part-Time**

This flexible, practice-based programme is for those musicians who wish to develop or refresh their professional practice for work in the creative industries, teaching, community-based education, and/or further study including PhD. You will be introduced to recent developments in your specialist field, and develop essential technical, research and communication skills.

You will choose one of three pathways (Performance, Composition and Creative Audio or Music and Communities) and will benefit from two specialist modules (Practice and Seminar) which place contextual, aesthetic, and theoretical study alongside the development of your practice.

Additional opportunities to enhance your chosen pathway include undertaking research and project work both inside or outside of the University and/or gaining specialist knowledge of the music industry via an understanding of legal, technological, and social developments.

You will complete a Final Project in a topic related to your chosen specialism which may be a dissertation, a practical piece of outreach work, a portfolio of compositions, or a final recital.

Cultural Heritage and Museum Studies

### Belfast

**Full-Time/Part-Time**

Designed for graduates, or those already working in the heritage sectors, this degree is informed by innovative research in key areas of practice. Together we will explore:

- Policy concerns relating to museums, arts and heritage;
- Challenges for the sector, such as pandemic recovery and decolonizing the museum;
- The social, economic, and cultural contexts of museums and heritage; and
- Management approaches relating to museums and heritage sites.

You will develop the appropriate skills for further academic study and professional development and practice. You will be offered a placement, recent hosts have included the National Museums Northern Ireland, Local Museums and the National Trust.

Our students come from diverse subject-backgrounds and geographical origins adding to the richness of your experience.

Established for 20 years, we have a thriving alumni network, some of whom you will meet as guest lecturers and placement hosts.

History

Full-Time/Part-Time

This is a broad-ranging programme covering the history of Ireland, Britain, Russia and the Soviet Union, the Mediterranean world, the British Empire and America since the early modern period. You will benefit from our wide range of specialisms in social, political and cultural history, and comparative and transnational histories. We have particular strengths in the history of medicine, ethics, and emotions. You will be taught by leading authorities in these fields and gain advanced training in historical methods, skills, and theories with historical experts.

You may also develop an innovative public history project before independently pursuing a dissertation topic of your own choice. The strongest social history dissertation is eligible for the annual Birley Prize (£750).

Programme Objectives

You will be able to:

- apply methodologies and methods, skills, and theories with historical experts.
- develop an innovative public history project.
- independently pursue a dissertation topic of your own choice.

History and Society: The Past and Present

The programme is designed to equip you with the practical skills to function successfully in the public sector and in tourism, The education sector, The European Union, Caring for and developing our collections. The programme provides you with the knowledge and skills to work in a range of museum-related sectors, including museums, galleries, archives, and heritage organisations.

The programme also covers a range of specialist areas, such as libraries, archives, museums, research for charities, official organisations, government, marketing, advertising, publishing, the civil service, or politics.

Awards Available

If English is not your first language, this course requires a minimum English level of IELTS 6.0, or equivalent. Visit ulster.ac.uk/englishrequirements for more details on English language requirements.
This course focuses on the applied fields of counselling, psychotherapy and health communication. It is aimed at professionals seeking to enhance their knowledge and skills as part of their continuing professional development (CPD), individuals with a degree in another discipline who are considering undertaking counselling or psychotherapy practitioner training in the future, or people interested in pursuing a PhD.

The course provides:
- Theoretical knowledge about counselling, psychotherapy and health communication.
- A deep understanding of psychological development and how it is influenced by the social and cultural contexts in which we live.
- Opportunities to hone observation and analytical skills, and develop a capacity for self-awareness and self-reflection.
- A chance to master the conceptual and practical tasks involved in conducting research rigorously, ethically and reflectively.

Graduates will need to do further practitioner training if they wish to work as a counsellor or psychotherapist. It is taught by an award-winning team of experienced practitioners and internationally-recognised researchers.

This specialist programme will prepare you to be operationally effective in digital marketing, communication and leadership. You will benefit from research-informed teaching and a core team of professional contributors who ensure the course delivers the practical knowledge and skills required by employers.

You will:
- Critically assess the changing business landscape to develop the knowledge, skills, and strategic vision required to lead organisations in the digital age
- Compare and contrast a variety of digital technologies and marketing communication approaches
- Strategically apply the latest digital marketing tools and techniques to achieve business communication objectives in support of organisational goals

Your learning experience:
- Input from leading practitioners, ensuring exposure to the experiences of professionals working in the field
- The use of case studies, providing the opportunity to develop solutions to actual business problems
- Assessments which require the application of learning to a live organisational context
- A multidisciplinary setting reflecting today’s more collaborative work practices

Both the academic and the geographical context make this course unique. The course is distinctive in its breadth, offering modules in core theoretical generative linguistics, conversation and discourse analysis, with special focus on the study of English.

You will develop many transferrable skills including the ability to construct and manage an argument; working as a team to achieve common goals; the ability to recognise and solve problems, using initiative and working independently; self-management with the ability to carry out personal reflection; time management and organisation skills.

The course team has strong links with speech and language therapy and several members are involved in research with clinical applications regarding language and communication disorders and multilingualism.

The course develops knowledge in the study of language and can lead to doctoral study in linguistics and careers in publishing and teaching. Many graduates have chosen this course as a stepping stone towards a career in speech and language therapy.

Accredited by the National Council for the Training of Journalists (NCTJ), the leading industry body for multimedia journalism.
This programme is a professional development course for teachers and other adult educators who wish to update their knowledge and qualifications. The award has been developed in conjunction with the teaching community and is designed to ensure you will have the opportunity to explore contemporary issues in education which impact upon your own professional practice.

We offer modules in a range of named specialisms or you can select modules depending on your area of interest and availability. The named specialisms are:
- Education Management
- Information and Communication Technology
- Inclusion and Special Education
- International and Comparative Education

If you take one module in a named specialism and complete a further education college or in the work-based learning sector.

For acceptance to this course, students must meet the entry requirements as set out at ulster.ac.uk and must liaise with their employer in order to provide evidence that they are employed in the work-based learning sector.

Successful completion qualifies you to seek registration with the General Teaching Council of Northern Ireland. To teach in other jurisdictions you will need to contact the relevant authorities to determine their requirements for recognised teacher status.

The Post Primary PGCE is for those who wish to teach the 11-19 age range.
This course prepares you to teach within the 4-11 age range. It leads to qualified teaching status within primary school. Successful completion qualifies you to seek registration with the General Teaching Council of Northern Ireland and the religious certificate is recognised by all four churches within Northern Ireland.

The major aim of this course is to help you acquire competence in the basic skills of teaching and classroom management within the primary school. In order to ensure a close link between theory and practice, the course includes both university and school-based work throughout the year. In total, you will spend 19 weeks in school and 19 weeks in university.

The course promotes your intellectual development and preparation for teaching and incorporates critical reflection in education issues, theories, and classroom practice.

Intended to enhance professional practice, this course is aimed at individuals already engaged in a teaching or training environment and aspiring to school or college leadership roles, including principal positions. Study is complemented by participant reflection on real situations and is supported by an experienced tutor, ensuring that successful graduates are extremely well-prepared to take up school principal positions.

The course focuses on four key areas:
- Building teams and managing resources: Personality interaction in relation to team theory, systems and their development
- Strategic development planning: Involving colleagues in ownership of the vision and strategy for system improvement
- Managing the organisation: Skills and competencies in matters of legal and financial challenges, personal competences in communication, negotiation and problem solving

Please note: Applications close in mid-September each year.

**Professional Recognition**

We are currently working with the General Teaching Council for Northern Ireland (GTCNI) with the intention of achieving Professional Recognition.

---

**Teaching of English to Speakers of Other Languages**

**Coleraine**

**Full-Time/Part-Time**

Open to those with or without teaching experience, you will study the theory and practice of teaching, from classroom management to syllabus design, and gain the expertise and confidence to teach English in a variety of settings to students from across the globe.

This is the only Masters level TESOL programme in the UK which offers an ERASMUS funded overseas placement. Full-time students spend eight weeks in Hungary teaching in primary or secondary schools, whilst part-time students spend four weeks in Hungary and four weeks in Northern Ireland. This offers an authentic environment to put your learning into practice*.

You will enhance your creativity and learn to adapt your teaching style and approach in order to support a range of learners, with consideration to ethical and cultural differences.

Graduates have gained work in private language schools, colleges, universities and schools in the UK, Ireland and many countries world-wide. Others have used their qualification to work for charities in developing countries.

*An alternative Northern Ireland based placement will be organised if the overseas placement cannot take place.

---

**Law – Access to Justice**

**Belfast**

**Full-Time/Part-Time**

This course is a unique legal education programme which supplements existing legal service provision by focusing on unmet need in the fields of employment law, social security law and family law. There is no other comparable course available in Northern Ireland or the island of Ireland.

You will be trained in social security law, employment law, alternative dispute resolution, tribunal representation and family law, in preparation for legal drafting and providing advice and advocacy to members of the public in Social Security or Employment Tribunals or to assist clients in family proceedings. This advice and representation will be provided through the Ulster University Law Clinic and/or on placement with the Social Justice Hub or advice sector organisations in semester two and three.

The programme also involves students in the development and management roles of the law clinic and further reflects on wider issues of access to justice, social justice, legal participation and dispute resolution.

---

Visit the online prospectus at ulster.ac.uk for further course details and full entry requirements.
Creating multi-disciplinary lawyers, legal professionals and technologists, this course provides you with an interdisciplinary skillset that distinguishes you from other graduates through teaching in computing, data science and business intelligence skills, alongside corporate, financial and technology law. The course is industry-focused, with international firms offering paid work placements, prizes, and specialist teaching input to students.

This distinct LLM/MSc degree programme suits aspiring and current lawyers, as well as other legal, business, and computing professionals wishing to gain multi-disciplinary skills and enhance career opportunities. You will explore the effect of emerging disruptive technologies in the field of law and develop practical skills in legal technology through the expertise of industry partners.

Graduates in this area are in high demand and can work in law firms, in-house legal teams, financial services, banking, consulting, and technology firms. The LLM/MSc is also the ideal platform for advanced research, including doctoral study in law or computing.

The School of Law in conjunction with Legal Island and the Labour Relations Agency (LRA) have created this postgraduate programme in Employment Law and Practice to:

- Develop an understanding of the core concepts of employment law and how they relate to practice
- Gain the skills and processes required to qualify students to practice in the employment law field as HR professionals/lawyers/advisors
- Develop students’ ability to reflect critically and learn from their practice
- Gain an understanding of regional, national, and international models of practice

The course includes lectures from employment law expert practitioners, role play exercises with LRA staff, and a mock Case Management Discussion adjudicated by the President of Industrial Tribunals and the Fair Employment Tribunal (TBC on an annual basis).

Professional Recognition

Successful completion of the Mediation module at LLM level may lead to an OCN accreditation in Mediation.

---

**Law – Employment Law and Practice**

**Belfast**

**Full-Time/Part-Time**

---

The LLM Gender, Conflict and Human Rights draws on the established research excellence of the Transitional Justice Institute to deliver a world-leading master programme in the field.

This programme has been developed to enable you to:

- Gain a systematic understanding, in-depth knowledge, and critical awareness of the differential experiences of women and men of human rights norms and institutions, especially in conflict and post-conflict situations
- Understand foundational concepts in gender theory and their application to human rights, international law, and transitional justice
- Gain knowledge and skills in conducting research projects from design to write-up
- Enhance skills in critically appraising published and commissioned research
- Develop skills highly relevant to legal practice, and to gender policy, research, and advocacy roles in the voluntary, public and private sectors in the UK, Ireland and beyond

Successful completion may also lead to a range of further study and research options.

---

**Law – Gender, Conflict and Human Rights**

**Belfast**

**Full-Time/Part-Time**

---

Based at the Transitional Justice Institute and with staff expertise across a range of areas, this degree is designed to give you a unique lens on the study of human rights.

Using the local Northern Ireland political and legal context as a starting point, you will develop working knowledge of international norms and principles, while moving beyond the local to reflect critically on present international law norms and their application to other situations and contexts.

You will be encouraged to develop and transfer knowledge, experience, and expertise of the transformative possibilities of human rights law, both in respect of societies emerging from violent conflict and in relation to the local and global management of other particular societal problems. This dual focus – from the local to the global and back – is a core part of the course’s aim to equip you with the knowledge and skills base to contribute internationally as well as locally.

---

**Law – Human Rights Law and Transitional Justice**

**Belfast**

Real Estate (with or without Applied Research)

Belfast

Full-Time/Part-Time
Applied Research available full-time only

This programme is a fantastic opportunity for ambitious and motivated graduates wishing to become real estate professionals at local, national or international level. Presented with an international perspective to reflect real estate’s role in today’s global business economy, this course focuses on development, investment and pricing, enabling you to appreciate the dynamics of real estate and capital markets. You will explore the key areas of real estate appraisal, portfolio management, investment risk and market analysis, relevant to the commercial real estate industry, banks and institutional investors. Graduates will be able to demonstrate knowledge and understanding of the property market alongside the core skills required by the industry, embracing investment and development appraisals, market analysis and cash flow modelling. Career paths include traditional residential/commercial agency, property development, property asset management and valuation roles as well as applying real estate skills in the banking, accountancy, and investment sectors.

Professional Recognition
Accredited by the Royal Institution of Chartered Surveyors (RICS).

Awards Available
- Masters - MSc with Applied Research
- Masters - MSc
- PGDip
- PGCert

#WeBuildCareers
Creating the next generation of high-quality professionals for the Computer Science industry.

This is a specialist programme that prepares you for an industrial career with a comprehensive understanding of advanced computing systems and application domains or embark upon PhD studies. Graduates can progress into a wide variety of careers, across industrial settings and application domains or embark upon PhD research studies.

### Artificial Intelligence

**Belfast**

**Full-Time/Part-Time**

Applied Research available full-time only

This is a specialist programme with the core aim to prepare students with skills in AI that are in high demand nationally and internationally. AI has applications in almost every industry sector including health, financial technology, advanced manufacturing, media, energy, civic society and public policy.

The course provides knowledge and skills in deep learning, data mining, machine learning, big data, automatic computing, robotics, knowledge engineering and data analytics in the context of AI with the use of state-of-the-art tools.

Course content is informed by our internationally leading research and industry partnerships including our jointly established BT Ireland Innovation Centre. You will benefit from a multi-million-pound infrastructure of a wide-reaching and mobile computing environment.

Graduates can progress into a wide variety of careers, across industrial settings and application domains or embark upon PhD research studies.

### Internet of Things

**Belfast**

**Full-Time/Part-Time**

Applied Research available full-time only

The Internet of Things (IoT) has become one of the most discussed technology trends of recent years, mainly due to the expected impact that it will have on how we live, work and travel. This is a specialist programme that prepares you for an industrial career with skills in computing science, engineering and data analytics.

As the expectations of how IoT will redefine how an organisation’s operations grow, so too are the expectations to have knowledgeable and skilled staff with an appreciation for business processes and market potential.

The course content is informed by our internationally leading research and strong industry partnerships, most notably our jointly established BT Ireland Innovation Centre.

Graduate opportunities exist across a range of industrial settings within the sector across the key verticals of Smart Cities, Industrial IoT, Connected Health and Smart Homes. Alternatively, you may want to embark on further research at the PhD level.

**Data Science**

*Belfast/Magee*

**Full-Time (Magee)/Part-Time (Magee or Belfast)**

Data science is a rapidly developing field of study within both academia and industry. Demand for data scientists and business analysts is high in many industries including IT, business, security and health sectors, intelligent transport, energy efficiency, and the creative industries.

This course will prepare you for a future career as a data scientist or business analyst, working in any profession where large amounts of data is collected and there is a need for skills in data acquisition, information extraction, aggregation and representation, data analysis or knowledge extraction and explanation.

You will benefit from a firm grounding in the core disciplines of data analytics and information processing, partnered with a broad appreciation of aspects of other disciplines where data science can form natural synergistic relationships.

We will help you to build your skills and professional network. Utilising our research expertise and industrial links, you will conduct data projects with internal departments and external university partners.

**Professional Recognition**

Accredited by The British Computer Society, the Chartered Institute for IT.

**Professional Software Development**

*Masters - MSc with Applied Research*

*Magee*

**Full-Time/Part-Time**

This intensive one-year Masters conversion course is aimed at highly motivated graduates with a good honours degree in any discipline other than computing. There is a strong demand in the local economy and beyond for graduates with software development skills. This course will give you the skills needed to apply best practice in software engineering across a variety of organisations. While the course has a particular focus on the employment needs of the local economy, the skills and abilities developed are easily transferred to a global stage.

You will cover topics including programming skills, computer hardware, operating systems, professional software development, software architecture and design, database systems, and web-based app development.

You will be well-placed to find employment in private industry, public sector organisations, and in research. You’ll gain the necessary skills to work in roles such as software developers, software testers and/or academic or commercial researchers, as well as have the capacity to diversify into other roles such as independent consultancy.

**Professional Recognition**

The MSc Professional Software Development is accredited by the British Computer Society (BCS), the Chartered Institute for IT, for the purposes of partially meeting the academic requirement for registration as a chartered IT professional.

Smart Manufacturing is a rapidly developing field of study within both academia and industry. This course provides professionals with expert, multi-discipline knowledge in the principles and application of Smart Manufacturing set within the context of the global business environment and global business operations.

Five core technologies that are essential to raise the development of manufacturing and productivity to the levels required in the next 50 years are Artificial intelligence (AI), robotics, automation, internet of things (IoT) and industrial digital technologies (IDTs).

You will be equipped with expert knowledge across multi-disciplines in the underlying science and application of manufacturing and mechanical engineering together with the computing topics of intelligent data analytics and robotics.

There is currently an extensive demand for engineering graduates, particularly those with the high-level skills to develop and operate smart factories, which will be provided by this course. Alternatively, you may progress to further study at PhD level.

Mechanical Engineering (with or without Applied Research)

This is a specialist programme which develops your knowledge and understanding of key theories and methods that underpin Mechanical Engineering and their intelligent application to solving industrial problems. This includes development of new technologies to meet engineering challenges of the future.

Driven by our industrial work and research, the course draws upon the heritage of Mechanical Engineering in the region and internationally recognised research in areas such as aerospace composites, polymers, advanced metal forming and nanotechnology.

You will build your skills and knowledge in finite element analysis and computational fluid dynamics, advanced manufacturing and design optimisation of mechanical systems with the opportunity to specialise in manufacturing systems, CAE for managers, polymer technology, composite optimisation, product process optimisation, entrepreneurship and quality improvement.

You will demonstrate advanced depth and integration of specialist Mechanical Engineering knowledge by successfully undertaking and completing a major dissertation based on original research or the implementation of new and advanced processes, procedures, and technologies into the industrial environment.

Scientist, investment banker, management consultant; our students come from all walks of life to be a doctor. You can too.

Study Medicine at Ulster – the only Graduate Entry Medicine course in Northern Ireland.

Do you already hold an Honours degree and want to study medicine?

Graduate Entry Medicine is designed for you! This accelerated course will equip you with the professional knowledge, skills, values and behaviours required to be a competent doctor.

Real world experience
- Contact with patients starts from the fourth week of year one
- Our clinical and communication skills tutors are experienced local GPs sharing their real-life experiences with you
- Our problem based learning model draws on your previous experience and skills

You will learn
- To fully understand the health needs of our communities and how to deliver the care required
- Anatomy with an emphasis on technology and live imaging
- How to communicate with patients from a wide range of backgrounds

Entry Requirements
- Refer to the University’s General Entrance Requirements
- Minimum of grade C in GCSE Maths
- Minimum of a 2:1 Honours degree in any subject OR
  If you do not have a 2:1, a postgraduate Masters degree with an overall pass of at least 60%
- Meet the required GAMSAT score
- Pass Multiple-Mini Interview assessment
- Access NI check and health clearance

Find out more about studying Medicine at Ulster - ulster.ac.uk/medicine

All new medical programmes must undergo regulatory approval with the GMC and to do this we are working closely with St George’s University of London as our academic partner.
This course is designed for those following careers as biomedical scientists in the wider context of biomedical science (including biopharmaceutical and bio-industries). The MSc Biomedical Science provides eligibility for the title of chartered scientist if the individual meets the other eligibility criteria of corporate membership of the IBMS and active engagement in continued professional development (CPD). It is not a suitable qualification for the purposes of Health and Care Professions Council registration in the UK. This course provides an academically challenging and vocationally relevant science education for those wishing to develop their career in the biosciences, pharmaceutical or bio-industries. Students can take specialisms in cellular pathology; clinical chemistry; haematology; and pharmaceutical or bio-industries. This course is completely online. The project is carried out in the students’ place of work under a work-based-supervisor. Suitably qualified graduates may also choose to proceed to higher postgraduate degree programmes within the biosciences.

Professional Recognition
Accredited by the Institute of Biomedical Science (IBMS) UK and approved by the Academy of Clinical Science and Laboratory Medicine.

Awards Available
Masters - MSc

Full-Time

This course is primarily designed for those who wish to develop their career in the biosciences with particular emphasis on biotechnology research in academia or bio-pharmaceutical and bio-industries.

With an advanced education in biotechnology research, you will acquire the knowledge and technological skills required to improve the pool of knowledge and technological skills available to support biotechnology-based industry and research nationally and internationally.

In the third semester of the course, students will have the opportunity to undertake an independent full-time research project within one of the research groups in the Biomedical Sciences Research Institute (BMSRI). The BMSRI research covers biomedicine from the molecular to the whole human including disease development, prevention, diagnosis and therapy.

Professional Recognition
Accredited by the Institute of Biomedical Sciences, UK.

Awards Available

This course is designed to be a complete introduction to the how, what and when of laser refractive surgery and refractive cataract surgery. You will develop the theoretical knowledge, qualities, and transferable skills necessary to effectively begin or improve your performance in both laser refractive surgery and refractive cataract surgery. This extensive course will cover key subjects in great detail:

- Basic theory of refractive surgery from how excimer lasers work, to ablation profiles and topography and aberrometry/wavefront science
- Therapeutic Refractive Surgery (corneal complication management) principles and approaches
- Modern laser procedures are dealt with in extreme surgical detail, including surface ablation (PRK, LASEK, EpilASEK, TransPRK), LASIK, SMILE. Phakic IOLs and Sizing of ICLs including the latest techniques
- Clear lens extraction is approached from the refractive surgery standpoint: management of astigmatism and higher order aberrations

After completion, further training and experience gained from shadowing individuals involved in the procedures or assisting those involved would continue to advance knowledge and understanding and develop new higher-level skills.

The overall aim of the pre-registration MSc Dietetics programme is to provide science graduates with core knowledge and professional competencies to practice as a registered dietitian (RD), and also develop advanced research skills. Registered dietitians are qualified and regulated health professionals who assess, diagnose, and treat diet and nutritional problems. Dietitians use the most up-to-date research on diet and health, which they translate into practical guidance to enable people to make appropriate lifestyle and food choices.

This full-time 20-month taught programme builds on prior learning and provides students with a practical and scientific understanding in the study of food and nutrition, and the effect of diet and health on wellbeing. Dietetic practice placement is integral to this programme and is undertaken in an approved setting in NI.

Closing date is 15 January annually. This course is currently not available to international (non EU students).

Professional Recognition
Graduates will be eligible to apply to the Health and Care Professions Council (HCPC) for registration as a dietitian or apply to CORU as part of the recognition process for validation of qualification to practice as a dietitian in the Republic of Ireland.

Awards Available
PGDip

The food and drink industry is a global business that is thriving; the food industry in the UK alone contributes almost £90 billion to the economy. While career opportunities within food and nutrition continue to expand, there is still a worldwide shortage of qualified graduates with food and nutrition knowledge and skills. You will gain an understanding in the key aspects of the science of food and nutrition in the context of regulatory affairs policy and legislation, including aspects of food toxicology, policy, and food legislation from an EU perspective.

This is an academically challenging and professionally relevant programme which will enable you to pursue a career in the area of food and nutrition. The course is aimed especially at those interested in the relationships between food, nutrition, and health, who wish to pursue a career within this challenging and rewarding environment.

Food regulatory affairs integrates science, law, and food/health policy as applied to the regulation of the entire food chain, from pre-harvest to the consumer. International perspectives on food regulatory affairs have become increasingly important, particularly since the formation of the World Trade Organisation and the international acceptance of Codex Alimentarius standards.

You will develop knowledge and understanding of legislative, policy, and scientific aspects of food regulatory affairs, as well as acquire skills to disseminate and implement knowledge in practice. European and global experts in science, law, economics, and policy contribute to the course.

This programme is designed for individuals already employed or who wish to develop careers in the food sector, regulatory agencies, government departments, and trade organisations with excellent employment opportunities in government (national and international) and non-government organisations, and in the UK, European and international agri-food industry.

The award is granted jointly by Ulster University and University College Dublin.

Human nutrition is the scientific study of the foods we eat, the nutrients in foods, the fate of the nutrients when they are eaten, and the effects of diet on health and wellbeing. As a graduate nutritionist, you will have the skills to scientifically evaluate the effects of diet on human health and wellbeing.

There is no placement external to the University, however you are required to undertake a three-month nutrition research project embedded within an internationally recognised research environment.

Graduates work in a variety of areas in the field of nutrition such as industry research or health promotion, or undertake further study such as Dietetics, Sports Nutrition or complete a PGCE.

**Professional Recognition**

Accredited by the Association for Nutrition (AFN) for the purpose of eligibility for Direct Entry Registration at Associate Level with the UK Voluntary Register of Nutritionists (UKVRN).

Our ability to understand how genes, lifestyle and environment can influence disease promises to revolutionise healthcare practices. Personalised medicine relies on using biomarkers (e.g. genes or proteins) to stratify (or split) patients into specific groups for diagnosing or treating diseases.

The ideals of personalised medicine will be realised with the development of technologies and systems to predict disease, select the best treatment, and reduce side effects for individual patients. This approach to streamlined healthcare provides more accurate clinical decision-making tools to identify the right treatment, for the right person, at the right time. This course provides an academically challenging science education for those who wish to follow a career within the area of personalised medicine.

Your future career will improve the quality of life of patients through better healthcare and smarter technologies to treat and manage diseases such as heart disease, diabetes, neurological disorders, cancer, or immune disease. Graduates may also choose to proceed to higher postgraduate degree programmes, including PhD.

**Professional Recognition**

Accredited by the Institute of Biomedical Science (IBMS).

Learn to increase your scope of practice and manage and treat a wider range of ocular conditions.

This programme compliments and extends our current General Optical Council approved BSc (Hons) Optometry course which has been producing high quality graduates for over 20 years. Designed in collaboration with ophthalmologists, pharmacists and independent prescribing optometrists, the course consists of two 30-credit modules: Principles of Pharmacology and Prescribing; and Assessment, Management and Treatment of Ocular Conditions.

Each module will comprise 12 online lectures supplemented with additional reading, structured discussion boards and assessment. The second module will be supplemented by a face-to-face teaching session which will help to prepare you for your clinical placement and The College of Optometrists Independent Prescribing Examination (Therapeutics Common Final Assessment).

Assessment will examine both the theory and practice of prescribing comprising a variety of methods including written assessments, multiple choice questions, Visual Identification and Management of Ophthalmic Conditions (VIMOCs), contribution to structured discussion boards and case studies.

**Professional Recognition**

This award is granted jointly between Ulster University and University College Dublin.

This programme will provide you with a broad knowledge of veterinary public health and food regulatory affairs issues. You will learn to assess available evidence and data, make sound judgements, and communicate findings effectively to stakeholders in the food chain including producers, regulators, industry and consumers.

Relevant UK, EU and international food regulatory policy will be covered and translated into a regulatory framework so that you can grasp the complex idea of total regulation of the food chain, from primary production, to consumer health issues. Core areas of VPH are addressed in relation to the regulatory responsibilities of veterinarians and the protection of animal health and welfare and human health. You will develop knowledge of legislative, policy and scientific aspects of VPH, as well as acquire skills to implement knowledge in practice.

On successful completion of the PGCert you can progress to the PGDip or Masters in Veterinary Public Health (Food Regulatory Affairs specialisation).

**Professional Recognition**

This award is granted jointly between Ulster University and University College Dublin.

This online course has been designed to meet the industrial and public sector demand for environmental managers. You will understand the breadth and role of management tools in the context of ecosystem structures, functions, legislation or policy frameworks.

Students will develop key skills in a range of areas including:
- Biodiversity management plans and site restoration design
- Ecological monitoring
- Environmental management systems
- Environmental impact assessment
- Research analysis and data interpretation techniques

This course is intended for graduates who lack professional experience in environmental management or for those who are already employed in the field but want to develop their management skills. Most of our students are already working in industry or public services.

This programme in Environmental Management with GIS provides an advanced education in environmental management, with an emphasis on the concepts and methods for analysing spatial environmental data which are encapsulated within geographic information systems.

Students will learn the principles and practice of environmental management within the contexts of biodiversity management and the contribution of empirical and case study scientific research, as well as fostering advanced knowledge and skills in the manipulation and analysis of spatial environmental data.

Key skills which will be developed are:
- Biodiversity management plans and site restoration design
- Ecological monitoring
- Environmental management systems
- Research analysis and data interpretation techniques
- Management, processing, analysis, interpretation, and presentation of geo-spatial data
- Operation and use of geographic information systems

The majority of students on the course are already working in industry or public services and taking the course has helped them to gain promotion and/or change careers as a result of their new skills.

Experience has shown that many students who register on this course are already working in the environmental field. We therefore aim to be as flexible as possible in terms of the topics studied and will give you the opportunity to focus on areas of particular interest to you and/or the organisation for which you work, where possible.

Strong links to consultancies and environmental agencies both private and governmental ensure that the course remains current and relevant to the needs of potential employers.

As the only provider of postgraduate level 7 education for the Allied Health Professions (AHPs) in Northern Ireland, we developed this programme to provide the profession-specific and interdisciplinary modules needed to facilitate career progression for Allied Health Professionals and healthcare scientists. This course delivers advanced education and professional training in several disciplines including occupational therapy, physiotherapy, speech and language therapy, podiatry, radiography, dietetics, and healthcare sciences. There is also tailored provision in stroke care, diabetes foot disease, and respiratory disease.

This course is delivered part-time via on-campus teaching blocks, or online to facilitate attendance by busy health professionals. Many of the modules in the MSc course can be taken individually as continuing professional development opportunities for AHPs and healthcare scientists to be taken. Successful completion of the Masters will provide the development opportunity for AHPs to progress to doctoral level activity.

You will have the opportunity to develop evidence-based theoretical concepts of limb preservation transferable to professional practice, informed by a critical knowledge and understanding of integrative care requirements for those patients at-risk due to diabetes.

The programme is designed for, but not limited to, specialist podiatrists, nurses, medical, surgical and healthcare professionals, and is targeted at those currently working in or with aspirations to gain further education and/or employment in the field of diabetes and limb preservation.

You will benefit from a range of learning experiences, across and between multiple disciplines which will enhance your knowledge and skills, encourage critical thinking, creativity and strategic planning in independent and/or supplementary prescribing within your professional field, thereby enhancing employability.

Professional Recognition
Approved by the Health and Care Professions Council (HCPC) for the purpose of providing eligibility to apply for registration with the HCPC as an Independent and/or Supplementary Prescriber.

This unique course is delivered online for occupational therapy graduates worldwide. You will cover topics such as entrepreneurial leadership to manage new ventures within the health and social care sector, coaching and leadership skills in preparation for supervision/mentoring roles, the clinical role of occupational therapy as well as reviewing global health inequalities and international standards of practice.

You will learn strategies to empower patients to manage their long-term conditions and develop research skills to inform clinical practice. You will engage in learning using digital interactive tools promoting communication and collaboration within an international, peer supported learning community.

International experts will help deliver the programme which can be studied full-time (one year) or part-time (within three years).

You will also engage in inter-professional learning alongside physiotherapy colleagues.

There will be an opportunity to reflect on current theory and practice, utilising evidence to translate learning and enhance practice. The course will equip you with the necessary skills, understanding and confidence to live, work and study in international contexts, increasing your global employability.

Changign health and social care requirements demand responsive, knowledgeable, creative and skilled graduates from the health and social care professions. This flexible, online programme, aimed at registered healthcare professionals, will develop the skills necessary to advance practice in your chosen profession. Within your area of expertise, you will enhance existing and develop new professional skills including critical thinking, leadership and innovation designed to assist you in playing a more effective role in increasingly complex professional environments.

The PGCert route is tailored and awarded on completion of 60 credit points. You can choose to study one of five pathways including Continence Care, Developing Practice, Neuroscience, Stoma or Urology Care with modules including the fundamentals of your chosen area as well as evidence based methods of changing and advancing care. The PGDip requires the completion of two additional compulsory modules, Advanced Methods in Research and Development in Health and Social Care and Global Perspectives in Transforming Health. The MSc requires the completion of a further 60 credit, evidence-based project.

Having completed the PGCert students will have the opportunity to exit or proceed to a higher linked course to continue their studies.

This unique course is for physiotherapy graduates worldwide. You will cover topics such as entrepreneurial leadership to manage new ventures within the healthcare sector, coaching and mentoring roles, the clinical role of physiotherapy in global health inequalities, as well as reviewing international standards of practice. You will learn strategies to empower patients to manage their long-term conditions and develop research skills to inform clinical practice.

You will engage in learning using digital interactive tools promoting communication and collaboration within an international, peer supported, learning community. International experts will help deliver the programme which can be studied full-time (one year) or part-time (within three years). You will also engage in inter-professional learning alongside other allied health professional colleagues.

There will be an opportunity to reflect on current theory and practice, utilise evidence to translate learning and enhance practice. The course will equip you with the necessary skills, understanding and confidence to live, work and study in international contexts, increasing your employability.

Visit the online prospectus at ulster.ac.uk for further course details and full entry requirements.

The course will be attractive to you as a healthcare professional who can see the role that learning and teaching plays in everyday practice and wish to equip yourself with the skills to participate in learning and teaching with peers, colleagues, students, and service users.

The course is primarily facilitated through practice learning supported by university sessions.

You will be introduced to the principles that underpin learning and teaching and the rationale behind decisions made about specific teaching practices or delivery. Building on this knowledge, you will then explore a variety of techniques used in practice such as small group teaching, facilitation, patient education and skills teaching.

Having completed the PGCert students will have the opportunity to exit or proceed to a higher linked course to continue their studies.

For those in health and social care professions, this course covers a range of healthcare issues, allowing for careers in health and social care, education, leisure, and health promotion and management.

This course provides you with the skills and knowledge to function at an advanced level within your area of expertise. There is an emphasis on the application of knowledge to practice and the development of leadership skills.

You will build knowledge and skills in the core areas of health and wellbeing, challenges and controversies, advanced research methods, alongside critical application of advanced compassionate communication in health and social care. You can choose to study either ethics and professional decision making, or transforming practice through person-centred collective leadership.

Alternatively, if you are a registered healthcare professional, you may choose to gain enhanced knowledge in diabetes care, stroke care, or forensic healthcare.

To proceed to a Masters, you must complete a dissertation.

### Health Promotion and Public Health

**Belfast**

**Full-Time/Part-Time**

Addressing the emerging need for public health challenges to protect and improve the health and well-being of populations, this course is designed to develop your knowledge and skill set for public health practice. This inclusive course attracts students from many different nationalities and disciplines who will enrich your overall learning experience. Our extensive links between employers and academic staff ensures that the course content is relevant to contemporary public health practice. Using an evidence-based approach, you will gain the knowledge and skills to understand how to assess needs, plan, implement and evaluate public health and health promotion interventions/strategies. We will provide you with a range of public health skills, including research epidemiological analysis. We ensure that your learning experience is highly practical by incorporating public health and knowledge frameworks and work-based practice into learning. You will spend time in a public health setting so you can relate theoretical concepts to practical situations within the field of public health.

**Professional Recognition**

On completion of the MSc there will be the potential for you to apply to become a registered public health and/or health promotion practitioner.

**Nurse and Midwife Prescribing**

**Belfast**

**Part-Time**

For registered nurses who need to prescribe in their nursing role, this programme will equip you with the knowledge, skills, attitudes, and competencies to meaningfully contribute to patient care in a safe and professional manner.

You will develop the knowledge and skills to:

- Demonstrate understanding of the legislation regulating nurse prescribing
- Review the implications for your professional practice of undertaking the extended roles of prescribing and practice within a framework of professional accountability and responsibility
- Use diagnostic reasoning skills on the data acquired from history and health assessment to achieve appropriate diagnoses
- Apply knowledge of pharmacology in prescribing appropriate drugs to achieve defined health outcomes
- You will be prepared to:
  - Prescribe safely, appropriately, and cost-effectively within administrative arrangements
  - Evaluate and document the effectiveness of drug therapy
  - Empower patients/clients, their carers and families through education for safe and effective self-management of drug therapy
  - Apply knowledge of pharmacotherapeutics, legal and ethical issues, and health assessment to the practice of person-centred prescribing

**Professional Recognition**

This is a recordable qualification with the NMC: V300 independent and supplementary prescriber.

**Midwife Prescribing**

**Belfast**

**Full-Time/Part-Time**

The MSc Nursing is for qualified nurses who wish to develop higher levels of criticality in research, practice, and leadership. This course is a challenging postgraduate qualification for nurses, midwives or health visitors from all fields of practice. You will build upon your existing knowledge, skills and values with an emphasis on developing your practice in the key areas of communication, health promotion, leadership, person-centred practice, and research. Enhancing your knowledge, understanding and critical thinking through classroom and personal study, the programme encourages qualified nurses, midwives and health visitors from all fields of practice to develop high levels of reflection, decision-making and criticality in nursing theory and research.

Applicants will be qualified nurses who are licensed/registered in their home country, and who typically hold a degree or equivalent. This is particularly useful for nurses who wish to develop their careers and strive for promotion, particularly those aspiring to higher roles in research, leadership and education. There are various pathways which can be undertaken within MSc Nursing, including dementia, leadership, nursing assessment, palliative care and education.

Physician Associate Studies
Magee
Full-Time

This is a full-time, two-year intensive medical training programme. It is designed to educate and produce knowledgeable and competent Physician Associates (PAs) who can practice medicine and support the medical team in the diagnosis and management of patients and provide high quality medical care across a range of medical specialties. The programme delivers the requirements of the Competence and Curriculum Framework for the Physician Associate, enabling graduates to successfully complete the university programme and preparing students for the PA National Examinations with the Faculty of Physician Associates. The first year of the programme is mainly theoretical and university-based (five days per week), with one day per week in a clinical setting (from the middle of year one). In second year, the majority of time is spent on clinical attachment with one day every ten weeks in university for formative or summative assessments. You will learn to take medical histories, perform physical examinations, request and analyse test results, diagnose illnesses, and develop treatment and management plans.

Professional Recognition
The qualification is not currently recognised outside of UK/Ireland and graduates from any UK University offering the PA course cannot work in the USA/Canada/Netherlands.

Specialist Community Public Health Nursing
Belfast
Full-Time

Only offered for health visiting and school nursing students, this course is designed to prepare students to develop the knowledge, understanding and skills necessary to meet the Standards of Proficiency for Specialist Community Public Health Nursing (NMC 2004) Health Visitor or School Nurse.

You will acquire the skills and knowledge required to deliver a practice that is safe and effective in maintaining and improving the health of the public and communities and acknowledges the responsibilities and accountabilities necessary for public protection. You will also develop the methods to reflect systematically upon and develop your practice through analysis, synthesis, and evaluation. The SCPHN programme embraces diversity on a local and global level and, reflecting a changing society, recognises the challenges of migrating populations and facilitates the student knowledge in recognising and responding to the needs of clients/families during resettlement periods.

Ulster is the sole provider in Northern Ireland of this course. The completion of this course allows you to progress your career and practice at a specialist level.

Specialist Nursing (Pathways)
Belfast
Full-Time/Part-Time

This course prepares nurses for clinical leadership roles in specialist nursing. On successful completion of the course you will be awarded both an academic award and a professional qualification which are recognised across Europe. ‘Specialist Nursing’ refers to the exercising of higher levels of judgment and decision-making in relation to the nursing care of individuals, families, and communities in four areas: clinical practice, care and programme management, clinical practice development and clinical practice leadership. Throughout the course you are supported to achieve clinical expertise and leadership in a specialist area of nursing. Academic and professional competencies are embedded in the four areas: clinical practice, care and programme management, clinical practice development and clinical practice leadership. This course is 50% university based study and 50% practice learning setting. There are a range of pathways to suit all nurses including district nursing, mental health nursing, learning disability nursing, and community children’s nursing. The full range of adult nursing specialisms includes palliative care, stroke care, diabetes care, emergency care and adult nurse.

Professional Recognition
Accredited by the Nursing and Midwifery Council (NMC).

Advanced Pharmacy Practice

Online

The MSc Advanced Pharmacy Practice aims to develop competencies as defined in the Royal Pharmaceutical Society Advanced Pharmacy Framework (APF); expert professional practice, collaborative working relationships; leadership; management, education, training and development; research and evaluation.

You will be admitted onto the MSc programme through Accreditation of Prior/Certified Learning having met the learning outcomes of the following modules from programmes successfully completed at NICPDP:

- Foundation Pharmacist Programme
- Pharmacotherapy for Pharmacist Independent Prescribers
- Medicine Optimisation for Pharmacist Independent Prescribers

In semester one you will complete the 20-credit Advanced Practice Development module. Semester two will begin with the 10-credit Research Methodologies for Advanced Pharmacy Practice module, which will result in a project proposal being submitted mid-semester, following which you will undertake a Research Project in Advanced Pharmacy Practice in semester two and three.

The course is a part-time distance learning programme delivered as a combination of online lectures, webinars and self-directed learning.

Pharmaceutical Sciences

Coleraine/Online

Full-Time Coleraine/Part-Time Online

The programme will provide an academically challenging and vocationally relevant education in pharmaceutical sciences, both theoretical and practical. You will learn to apply your knowledge, skills and technology for the benefit of the pharmaceutical and related industrial sectors.

You will receive an up-to-date understanding of core areas of pharmaceutical sciences including drug discovery, development, formulation and delivery; quality assurance and evaluation of drugs, analysis of medicines and medicinal natural products and pharmaceutical instrumental methods. It will increase your awareness of ethical issues and scientific integrity in the pharmaceutical sciences.

Elective modules allow you to specialise in one of the core specialisms of pharmaceutical sciences. As a MSc student you will learn to formulate hypotheses, design, conduct, analyse and report research.

This course is designed to meet the demands of employers and is also suitable for academics who wish to enhance education in this area.

Applied Behaviour Analysis

Coleraine

Part-Time

This course is designed for professionals who work (or intend to work) in the caring professions. You will develop your theoretical and conceptual knowledge in behaviour analysis, develop skills in behaviour assessment, and acquire the ability to work in partnership with clients where they plan and implement programmes that are aimed at establishing, strengthening and/or weakening targeted behaviours.

It aims to provide a foundation to prepare those interested in applying for the internationally recognised examination leading to Board Certification in Behaviour Analysis (BCBA). This course will normally be completed over two calendar years to allow time to obtain relevant work experience, which is a requirement for future certification. Part-time students will study for two years at Ulster. There is also the possibility of a placement year at the New England Center for Children in Boston.

Graduates have successful careers in health authorities and charities as behaviour specialists, or gone to work privately by providing home and school-based behavioural interventions for families. Graduates have also progressed to work as behaviour analysts in countries including the US, Canada, the United Arab Emirates, New Zealand and Australia.

Professional Recognition

The MSc Applied Behaviour Analysis is a Verified Course Sequence of the Behaviour Analyst Certification Board.

Applied Psychology (Mental Health and Psychological Therapies)

Coleraine

Full-Time/Part-Time

The comprehensive syllabus of this MSc course will enhance your skills and competencies in areas required by all professional psychologists. The course provides an in-depth consideration of psychological theory and research concerned with the aetiology, assessment, and treatment of psychological problems across the lifespan.

You will be provided with a working knowledge of some of the major psychological therapies (namely Cognitive Behavioural Therapy, and Family Therapy and Systemic Practice), and will gain some practical experience in their use, with the additional opportunity to apply for clinical placement during and after the course. You will also undertake a Masters level research project.

Our graduating students have successfully acquired Assistant Psychologist positions, gaining experience which has enabled them to progress to Associate Psychologist roles. Others are successful in gaining entry onto Professional Doctorate programmes in Clinical, Counselling, and Educational Psychology, or have secured research posts and PhD scholarships in Psychology across the UK and Ireland. In addition, students who have undertaken the accredited Psychological Wellbeing Practitioner (PWBP) training strand within the course have successfully acquired PWBP positions.

风控蓝图
Health Psychology

Online

Full-Time/Part-Time

Health Psychology is developing rapidly in the UK and internationally in response to the increase in non-communicable diseases, such as diabetes and obesity. There is growing need for a psychological approach to managing lifestyle choices and healthcare delivery to address the impact on health.

Providing stage one of the professional training in Health Psychology, this course is for graduate students who wish to pursue professional careers in Psychology and its applications to health and illness.

Alongside building your knowledge and skills in Health Psychology, you will further develop independent learning, verbal and written communication skills, time management, and research skills.

Many of our graduates pursue a career as a professional psychologist, and many will go on to complete stage two of the training required to become a registered health psychologist.

You will acquire the knowledge, critical awareness and transferable skills required for clinicians aspiring to engage in the field of sport and exercise medicine. The teaching faculty is multidisciplinary and comprises clinical specialists from psychotherapy, sports medicine, exercise physiology, orthopaedics, radiology, and biomechanics. Modules focus on sports injury management, sports rehabilitation, biomechanics, optimizing exercise and load, and research skills. Core modules comprise both theoretical and practical components and have significant clinical and vocational relevance. You will be required to undertake an independent research project in your final semester.

The specialist knowledge and skills gained will enhance your opportunities to progress in your career.

Professional Recognition

This course is accredited by the British Psychological Society (BPS).

Belfast/Jordanstown

The course is aimed at clinical professionals working as medical doctors, physiotherapists, and other registered health professionals. The overarching aim of this course is to develop practitioners who understand the importance of evidence-based and specialist reflective practice, and who will enhance the healthcare of people involved in sport and exercise within the UK, Ireland and beyond.

You will acquire the knowledge, critical awareness and transferable skills required for clinicians aspiring to engage in the field of sport and exercise medicine. The teaching faculty is multidisciplinary and comprises clinical specialists from psychotherapy, sports medicine, exercise physiology, orthopaedics, radiology, and biomechanics. Modules focus on sports injury management, sports rehabilitation, biomechanics, optimizing exercise and load, and research skills. Core modules comprise both theoretical and practical components and have significant clinical and vocational relevance. You will be required to undertake an independent research project in your final semester.

The specialist knowledge and skills gained will enhance your opportunities to progress in your career.

Professional Recognition

This course is accredited by the British Psychological Society (BPS) and meets the standards of Level 1 BPS requirements for chartership as a sport and exercise psychologist.

Sport and Exercise Nutrition

Belfast/Jordanstown

Diet and nutrition significantly affect sport and exercise performance. The food and fluid which an athlete consumes before, during, and after exercise affects health and body composition, as well as performance and recovery. Sound knowledge of sport and exercise nutrition can ensure a healthy balance between exercise and diet for a range of athletes, from amateur to elite levels within different sports.

This programme provides a postgraduate pathway for those interested in pursuing a career in the area of sport and exercise nutrition. As an accredited course, graduates are eligible to register with the British Dietetic Association (BDA) Sport and Exercise Nutrition Register (SENHR) as a graduate registrant, allowing them to work autonomously post-graduation.

Career options are expanding and previous graduates have gained employment with leading organisations within the UK, Ireland and internationally, including IRFU, Ulster Rugby, Dairy Council (NI & UK), Rowing Ireland, Apple and Fit Republic, Dubai.

Professional Recognition

Accredited by the British Dietetic Association (BDA), Sport and Exercise Nutrition Register (SENHR).

Sport and Exercise Psychology

Belfast/Jordanstown

This course is designed for aspiring professionals in the field of sport and exercise psychology. You will gain professional training in the provision of psychological support to clients, acquire vocationally related psychological skills, develop a critical thinking approach to the existing knowledge base, and conduct research, all within a science practice led model. You will gain a grounding in the theory, themes, issues, and practical skills central to the knowledge base of sport and exercise psychology. This thematic approach supports and reflects the critical philosophy that underpins the programme and is central to teaching, learning, and assessment. The three main themes of theory-practice, individual content, and stability-change permeate throughout the taught modules. Upon successful completion, you will possess professional skills in consulting, advanced research, relevant personal skills, and an understanding of the high-performance environment. Career opportunities include teaching, research, or consulting in sport sciences or psychology, provision of clinical/ counselling services to various groups including athletes, health promotion, or PhD research study.

Professional Recognition

The course is accredited by the British Psychological Society (BPS) and meets the standards of Level 1 BPS requirements for chartership as a sport and exercise psychologist.

**Strength and Conditioning**

Full-Time/Part-Time

Belfast/Jordanstown *

As a profession, strength and conditioning has seen substantial growth in the past 40 years. Strength and conditioning coaches, in collaboration with athletic trainers, physiotherapists, nutritionists, sport scientists, and other allied professions, are now commonly part of a team that provide support services to athletes.

The knowledge base that is utilised by strength and conditioning coaches cuts across anatomy, exercise physiology, biomechanics, nutrition, and sport psychology. Developed to reflect the guidelines published by the National Strength and Conditioning Association (NSCA), key stakeholders from industry have also been consulted to help formulate a needs-led curriculum. You will cover topics including principles and practice of strength and conditioning, nutrition and exercise metabolism, optimising exercise, programme design, motor cognition and performance, and applied statistics. You will also conduct a research project.

Employment opportunities for aspiring strength and conditioning coaches exist in government-funded organisations such as schools, colleges, universities, national/state institutes of sport, and privately funded professional organisations or individual athletes.

**Accounting**

Full-Time

Belfast

Offering a fast-track qualification for graduates with non-accounting degrees who want to pursue a career in accounting, you will acquire a basic knowledge of the core areas of accounting and on successful completion, will have taken the first steps to becoming a professionally qualified accountant.

This programme will be of interest to graduates who wish to gain exemptions from professional accounting examinations. Successful students can progress to the MSc Advanced Accounting or MSc Strategic Accounting, or directly to an accounting training contract to become a professionally qualified accountant. The programme has excellent postgraduate employment rates. Through the University’s Employability and Careers Service, we facilitate meetings with prospective employers during the programme.

**Professional Recognition**

Accredited by Chartered Institute of Management Accountants (CIMA), Association of Chartered Certified Accountants (ACCA) and Chartered Accountants Ireland.

**Advanced Accounting**

Full-Time

Belfast

This popular vocational programme is designed to meet the needs of accounting graduates who wish to pursue a career as a chartered accountant. It is an academically challenging programme which attracts high-calibre accounting graduates. It allows students to combine a postgraduate masters qualification with study for professional examinations.

The programme is accredited by Chartered Accountants Ireland (CAI) and is currently the only such recognised programme in Northern Ireland which offers accounting graduates the opportunity to gain both a Masters degree and full CAP2 exemptions from CAI.

The goal of this programme is to produce high-calibre graduates who will progress quickly through their professional training and advance to senior management positions either within professional practice or industry. As a result of the considerable exemptions from CAI examinations and sponsorship from employers, employment prospects are excellent.

**Professional Recognition**

Accredited by Chartered Accountants Ireland.

Global Investment Management

A fast-track qualification for non-finance graduates seeking employment in the rapidly growing financial services sector. This intensive programme is designed for those with a business or related discipline degree e.g. law, economics, computing. You will gain an in-depth understanding of core financial principles, theory and practices that underpin the wholesale financial services sector in the areas of financial reporting, risk management, regulation, economics, research and fund management.

You will gain an in-depth understanding of core financial principles, theory and practices that underpin the wholesale financial services sector in the areas of financial reporting, risk management, regulation, economics, research and fund management.

A unique aspect of the programme is the option to undertake a placement with a wholesale financial firm. A wide range of placement opportunities are available including Citigroup, PwC, Augment, EY, Pearson and MTS Wealth in Belfast with other options being available in Dublin (subject to interview and availability). The programme is primarily structured to aid graduates in gaining employment in the wholesale financial services sector or proceed to further research-based study at PhD level.

Professional Recognition

The programme is recognised by the Chartered Institute of Securities and Investment (CISI) and graduates will be entitled to associate membership of the CISI.

International Accounting with Analytics

This course is shaped by the needs of the accounting, finance, and taxation professionals of tomorrow. Designed for accounting/business graduates, you can gain exemptions from professional examinations whilst gaining practical analytics skills essential to the profession.

You will cover topics such as international audit and assurance, advanced taxation, international financial reporting, strategic leadership and data analytics for finance professionals.

The combination of subjects studied encourage critical and creative thinking, teamwork and communication - a diverse range of professional attributes which will equip you to excel in your career.

Qualified accountants are always in high demand and the profession provides excellent employment and earning prospects across many areas of business including accounting, finance, taxation, or management in public, private or not-for-profit organisations.

Upon graduation you will be a step ahead in your professional accountancy training with only a three-year training contract and you should only have two more final admitting examinations to enable you to become a Chartered Accountant.

International Business

Online
Full-Time/Part-Time

This course will give you a deep understanding of the macro and micro contexts of international business, as you acquire, develop, and integrate international business theory, and build the skills needed to apply this to international business practice. Core management techniques are analysed from a global lens to understand their application and impact. This fully online programme offers a flexible learning experience to study at a time and pace that suits you.

You will gain expert knowledge and understanding of the political, social, and cultural aspects of business, focusing on the European Union, Asia, and the USA.

You can choose to further specialise in Data Analytics or Human Resource Management learning which will be reflected in your degree title.

This programme is designed to give you knowledge, skills, and tools necessary to compete in a rapidly developing and constantly evolving global business environment.

Executive Leadership

This course recognises that three key aspects of leadership are crucial to an organisation’s success - personal leadership of its key staff, organisational leadership within its sector and ethical leadership.

In this course we show how leaders in organisations can develop and nurture strategic thinking at all levels. To be a strong role model is important too, so up to date approaches to ethics and governance feature throughout. There is also the opportunity to identify and develop personal effective leadership traits and behaviours that are necessary to succeed in the emerging borderless, anarchic, knowledge driven global economy.

An integral part of the programme is a period of study at the Global Leadership Institute, Boston College, USA. Boston College is one of the world’s leading universities. Here we offer an unrivalled opportunity to meet with and discuss how world-class CEOs are constantly innovating and re-inventing their organisations to stay ahead.

Management (with or without Advanced Practice)
Belfast
Full-Time/Part-Time
Advanced Practice available full-time only

Are you looking to progress your career in management? Do you want to be a key decision maker who leads with purpose? The MSc Management course combines study with practical experience meaning you will graduate ready to manage, lead and inspire with confidence.

Covering key management skills including marketing, finance, people, operations, innovation, and strategy, you will also have the opportunity to work on real-life business cases providing you with first-hand practical experience, preparing you to make an impact in industry as soon as you graduate.

Past graduates have gained employment in positions such as frontline managers, consultants, and business developers. Alternatively, you may proceed to a research opportunity in the various business-related programmes offered at the University.

The only course in Ireland which combines postgraduate study in management and corporate governance with an in-demand Chartered Governance Institute Qualification (GradGC). This demanding and rewarding programme can help you work towards the professional CG Affiliated qualification, awarded by The Chartered Governance Institute, the professional body for chartered secretaries. Get the knowledge, professional and transferable skills that will equip you for senior appointments in industry, the social economy, voluntary, charitable, and public sectors in roles such as corporate secretary, corporate administrator, and head of compliance.

The course will equip you for a career in professional services through:
- Development of transferable intellectual skills necessary for senior management roles
- Application of corporate governance to the organisation
- Study of management and organisational behaviour
- Management of the finances of the organisation
- Management of the legal environment of the organisation

There is a huge demand for graduates of this course.

Professional Recognition
Upon completion you will meet the professional requirements of The Chartered Governance Institute. Those with the relevant work experience can apply for chartered secretary status and use the post nominal: ACG.

#WeAreUU
A challenging programme designed for experienced or aspiring managers who wish to expand their knowledge and skills to equip them for senior management positions. You will relate your work experience to business theory, broadening your understanding of organisations and the increasingly competitive environment in which they operate. You will learn with a diverse group of experienced executives, managers, entrepreneurs and business leaders from across the private and public sectors, enhancing your knowledge of business functions, processes, and strategies. You will examine your own business practices and management style and develop your strategic and critical thinking skills.

The Executive MBA allows you to make an impact in the workplace via practical project-based assessments. Graduates have a track record of delivering strategic value to their organisations and as a result, have advanced their careers with their employers.

The MSc Sport Management is suitable for aspiring graduates introduced to meet an increasing demand for highly skilled managers in sport, this course provides an introduction to the key areas of business, management and sports management which are essential to build a successful career in the sports industry. The MSc Sport Management is suitable for aspiring graduates from any academic discipline.

We ensure you have the practical and commercial knowledge required to make a difference and that this knowledge is put into practice via an in-built sports consultancy project.

You will acquire the knowledge and skills required to forge successful careers in commercial areas of the sports industry. Many graduates take up roles within the sports industry, in consultancy, marketing, or administration.

Others use their internship as an opportunity to build and develop effective links with employers. Our students have worked for organisations such as the Belfast Giants, Ulster Sport Academy, Sport Ireland, Adidas, Ecco, and the Irish Football Association.

The course uses a mix of applied theory, practical teaching and real-world project-based learning to develop the business acumen and leadership skills required to manage and lead transformation and sustainable change. This course encourages collaboration, providing the opportunity to explore ideas, network, and learn with like-minded people.

Part-Time 2 year PT degree (TopUp) / Higher Level Apprenticeship

This course prepares teachers, tutors, or trainers in the field of further education and training by supporting them in their initial years of employment. It is considered a pre-requisite for the PGCE (FE).

I Will Learn
- Teaching strategies including behaviour management and how to create an effective and cohesive learning environment.
- How to integrate technology as a means of enhancing the learning experience.
- How to plan lessons and achieve learning outcomes.

* This course will be delivered across two campuses, see page 42 for more detail.

Transform your future with part-time study.

#WeBuildCareers
Masters Programmes
Course Start Dates

Most of our Masters programmes commence in September with a limited number of courses which start in January.

Short and Continuous Professional Development Courses

Our short courses have start dates throughout the year. Visit our website to get the latest course start dates.
ulster.ac.uk/study/postgraduate

General Entry Requirements

To apply to our postgraduate taught programmes, you must meet the University’s General Entrance Requirements and any course-specific requirements. These vary depending on the course and are detailed online.

If your first language is not English, you will also need to meet the English language requirements for your given course.

Visas for EU Students (excluding ROI)

If you plan to arrive in the UK from 1 January 2021 onwards and are studying a course which is longer than six months in length you will need to apply for a student visa. Your application must be completed and accepted before you arrive in the UK. You will also need to pay an application fee, have a current passport or other valid travel document and pay a fee called an Immigration Health Surcharge.

For more guidance, please visit study-uk.britishcouncil.org/moving-uk/eu-students or gov.uk/student-visa.gov.uk/student-visa (Guidance as of 8/1/2021 and is subject to change).

Your Application

You can apply directly to Ulster any time of year. We advise that you submit your application two weeks prior to your course start date to ensure sufficient time to review your application and, should you be made an offer, complete all necessary enrolment admin.

To start an application, you must create an Ulster University account. Do not worry. You don’t need to complete your application in one go. We understand that this is a big decision. Our admissions team are on hand to help you with both the form and any documentation that you may need as part of your application.

Alumni Discount

If you have completed your undergraduate degree at Ulster University, you are eligible to apply for our alumni discount of 10% off your tuition fees.

Fees and funding

**Tuition fees**

We want you to make the most of your opportunities at Ulster. To do this, we want you to have a full understanding of the costs involved to study at Ulster and the available financial assistance.

**Build towards a Masters at your pace and budget**

For a number of our courses, you can build towards a Masters degree by completing Postgraduate Certificates and Postgraduate Diplomas until you reach your Masters destination.

**Course specific tuition fees**

Depending on the nature of the course, some courses cost more than others. Check the individual course pages online for the exact rate.

Visit ulster.ac.uk/pg-fees for up-to-date information on tuition fees.

If you choose to complete your studies with a Postgraduate Certificate or Postgraduate Diploma, fees are charged pro-rata.

**Funding**

Did you know you may be eligible for a Postgraduate Tuition Fee Loan of £5,500* towards the cost of your study? It’s available for full-time, part-time and distance learning postgraduate courses.

**Flexible payment options**

To help spread the cost of your studies, we have flexible monthly payment options available.

- Five-month payment plan can be paid by direct debit
- Ten-month payment plan can be paid by a Recurring Card Payment plan (credit/debit card)

**Pay your fees in full discount**

If you pay the full cost of your fees at enrolment, you will receive a 5% discount. This cannot be used in conjunction with any other discount.

Disclaimer

1. The University endeavours to deliver courses and programmes of study in accordance with the description set out in this prospectus. The University’s prospectus is produced at the earliest possible date in order to provide maximum assistance to individuals considering applying for a course of study offered by the University. The University makes every effort to ensure that the information contained in the prospectus is accurate, but it is possible that some changes will occur between the date of printing and the start of the academic year to which it relates. Please note that the University’s website is the most up-to-date source of information regarding courses, campuses and facilities and we strongly recommend that you always visit the website before making any commitments.

2. Although the University at all times endeavours to provide the programmes and services described, the University cannot guarantee the provision of any course or facility and the University may make variations to the contents or methods of delivery of courses, discontinue, merge or combine courses, change the campus at which they are provided and introduce new courses. Each action is considered necessary by the University acting reasonably. Not all such circumstances are entirely foreseeable but changes may be required if matters such as the following arise: industrial action interferes with the University’s ability to teach the course as planned, lack of demand makes a course economically unviable for the University, departure of key staff renders the University unable to deliver the course, changes in legislation or government policy including changes resulting from the UK departing the European Union, withdrawal or reduction of funding specifically provided for the course or other unforeseeable circumstances beyond the University’s reasonable control.

3. If the University discontinues any courses, it will use its best endeavours to provide a suitable alternative course. In addition, courses may change during the course of study and in such circumstances the University will normally undertake a consultation process prior to any such changes being introduced and seek to ensure that no student is unreasonably prejudiced as a consequence of any such change.

4. Providing the University has complied with the requirements of all applicable consumer protection laws, the University does not accept responsibility for the consequences of any modifications, relocation, or cancellation of any course, or part of a course, offered by the University. The University will give due and proper consideration to the effects thereof on individual students and take the steps necessary to minimise the impact of such effects on those affected.

5. The University is not liable for disruption to its provision of educational or other services caused by circumstances beyond its reasonable control providing it takes all reasonable steps to minimise the resultant disruption to such services.
